GENERAL INFORMATION

All goods are manufactured and shipped F.O.B., Irvington, New Jersey, U. S. A., unless otherwise stated. Ask for current net price sheet applying to this catalog.

We do not carry stock elsewhere but distribute through the legitimate wholesale trade throughout the United States and Canada and through our own representatives in all foreign countries.

Free Sales Helps—Attractive Folders, Window Posters, Counter Displays and Loose Leaf Catalog Pages are available. Also, electrotypes of all products for reproduction in catalogs and printed matter.

We ordinarily ship orders the day received—as we carry complete stocks in our warehouse ready for shipment.

Red Devil Tools are guaranteed to be free from defects and to work perfectly.

We believe our position as the largest manufacturers of glass cutters, glaziers' points, wood scrapers, wedges and paint conditioners is due to 1st—quality; 2nd—service, and 3rd—salability of our products; and we are continuing to devote our best efforts to improvements in these directions.

Make us your regular source of supply, taking advantage of our combined shipments on all glaziers' and painters' sundries.

This catalogue supersedes current catalogues Nos. 15 and 16

FORWORD

WE dedicate this new catalogue, which shows all the Red Devil products, to our customers everywhere, who have so faithfully supported and encouraged this Company and who have contributed many of the ideas which have helped to produce the type of merchandise that bears the Red Devil trademark.

We have endeavored to fully describe these products in group form, thus making it possible to quickly ascertain the range of sizes, types, and prices on related lines and at the same time to include the essential information to expedite sales when the catalogue reaches the hands of the customer.

We fully realize that in order to be successful manufacturers, we must produce merchandise that consumers need and want. Therefore, it is our aim to manufacture products which are in steady demand months and years after introduction and which are, after all, the most profitable items to distribute. Through the wide and varied Red Devil lines which are now on the market, we feel we have accomplished this purpose. We know you will find many numbers bearing the Red Devil trademark that have and will become world famous for this reason.

Our customers will be interested to learn of the recent acquisition of the Rugaard Manufacturing Company of Lawrence, Massachusetts, makers of the well known Leader Floor Sanding Machine. This machine is now in production in our Irvington plant under the supervision of the same skilled engineers who are responsible for the production of the newly enlarged line of Red Devil Paint Conditioners. We also call to your attention the newly developed Red Devil Electric Fencer. Both of these products introduce the Red Devil trademark into new and fast growing fields of a wide scope.

Most of our customers know of the exceptional record of sales increases made by us during the last seven years. These increases are partially due to expansion into new lines; but we feel they are chiefly due to customers' recognition of real quality and consequent ready acceptance of the famed Red Devil trademark. This confidence has placed a real responsibility on our shoulders which we at Irvington accept and will maintain.

The Red Devils

WORLD FAMOUS GLASS CUTTERS

Red Devil

No. 024

THE ORIGINAL WORLD'S STANDARD GLASS CUTTER

Now With Heavily Plated Finish

Price 20c

Universal—For Sheet and General Glass Cutting

This number is known the world around as the most popular and largest selling glass cutter ever manufactured. Recent developments by Red Devil engineers have still further improved No. 024 and it is truly the leader in our standardized line of new Red Devil Glass Cutters.

RECENT IMPROVEMENTS

1. Machine made, uniform alloy steel wheels. By a new method of pressing the edge and grinding and honing we have developed a much smoother wheel which needs no breaking in and will last longer. An entirely new installation of the very latest electrical hardening equipment designed for this one purpose, makes the wheel tougher and gives still longer life.
2. Oversize axle, made of hard bronze drill rod, makes the smoothest running bearing possible and eliminates all possibility of rust.
3. Entirely new design easy finger rest handle, shaped to fit the hand with long reach head to facilitate reaching across the glass. Cutter can be grasped either way up and still balances nicely.
4. Entire cutter now heavily plated and polished. This brand new development makes cutter slide easily along rule and is easy on hand. Bright red trademark and red tip (also registered trademark) give the entire cutter a smooth finish and greatly increased eye appeal.
5. Attractive new self-contained display box takes less room on shelf and displays cutters to a much better advantage. Due to plating and bronze axle individual boxes are no longer necessary as in old style cutters.
6. Pregreased—lubricating the wheel and axle for longer life.

No. 024 cutter is supplied with new handle in bright red enamel finish for export and other orders. Red handle will be shipped on export orders unless otherwise instructed. Specify No. 024X for solid red handle.

Quality Features

No. 024—overall length 5". Red Devil standard design easy finger rest handle—heavily plated finish—long reach head—bright red under trademark and bright red tip (Red Devil and Red Tip trademarks registered). Bronze axle—Pregreased.

Uses Red Devil No. 242 wheel (see page 15).

Red Devil No. 024—12 in new type display, 5 gross in case, weight 50 lbs. See inside back cover for newly designed metal panel to display the new No. 024 cutter in the Red Devil Junior Billboard, (page 51) or individually.

WORLD FAMOUS GLASS CUTTERS

THE ORIGINAL WORLD'S STANDARD BALL KNOB GLASS CUTTER

Now With Heavily Plated Finish

Red Devil

No. 023

Price 20c

**For Cutting Hard, Rough Ribbed and Cathedral
Glass or Wherever Tapping Is Advisable**

While Red Devil No. 024 is well called the original World's Standard Glass Cutter, Red Devil No. 023 fully justifies the title of the original World's Standard Ball Knob Glass Cutter. This cutter with its famed Ball Knob, developed for use in cutting all types of glass wherever tapping is advisable, has been redesigned and now features:—

Machine made, uniform alloy steel wheels. By a new method of pressing the edge and grinding and honing, a much smoother wheel has been developed which needs no breaking in and will last longer.

Oversize axle, made of hard bronze drill rod, makes the smoothest running bearing possible and eliminates all possibility of rust.

Standardized design easy finger rest handle, shaped to fit the hand with long reach head to facilitate reaching across the glass. Cutter can be grasped either way up and still balances nicely.

Entire cutter now heavily plated and polished. This new development makes cutter slide easily along rule and is easy on hand. Bright red trade mark and red tip give the entire cutter a smooth finish and greatly increased eye appeal.

Attractive new display box takes less shelf room and displays cutters to a much better advantage. Due to plating and bronze axle, the old style individual boxes are no longer necessary.

No. 023 cutter is supplied with new handle in bright red enamel finish for export and other orders. Red handle will be shipped on export orders unless otherwise instructed. Specify No. 023X for solid red handle.

Pregreased—lubricating the wheel and axle for longer life.

Very large production allows this cutter to be sold at the same price as No. 024.

Quality Features

No. 023—overall length 5". Red Devil standard design easy finger rest handle—heavily plated finished—long reach head—bright red under trademark and bright red tip (Red Devil and Red Tip trademarks registered). Bronze axle—Pregreased.

Uses Red Devil No. 242 wheel (see page 15).

Red Devil No. 023—12 in new type display, 5 gross in case, weight 50 lbs. See inside back cover for newly designed metal panel to display the new No. 023 cutter in the Red Devil Junior Billboard, (page 51) or individually.

WORLD FAMOUS GLASS CUTTERS

Red Devil THE ORIGINAL GLASS CUTTERS

For Cutting Plate, Heavy, Laminated
and Polished Glass

Now with Heavily Plated Finish

No. 031

Price 20c

This redesigned cutter, is identical with Red Devil No. 024 (Page 4) except that it has a special wheel developed by Red Devil Engineers in co-operation with the largest glass plant in the world, for cutting plate glass. It is useful for plate, all heavy and polished glass and pattern cutting. The specially developed wheel needs no breaking in.

Quality Features

No. 031—overall length 5"—Red Devil standard design easy finger rest heavily plated finish handle—Long reach head—Bronze Axle—Pregreasing.

Uses Red Devil No. 232 Wheel (See Page 15).

Red Devil No. 031—12 in new type display. 2½ gross in case. Weight 25 lbs.

*On export orders, Model No. 031X (Same as Domestic Model with the exception of Bright Red Enamel Handle) will be shipped unless otherwise specified.

No. 032

Price 20c

For plate, polished and all smooth glass, the redesigned No. 032 is rapidly replacing the old type plate glass cutters. Has the standardized ball knob heavily plated finish handle of the No. 023 with special plate glass wheel requiring no breaking in.

Quality Features

No. 032—overall length 5"—all features of No. 023 Cutter.

Uses Red Devil No. 232 Wheel.

Red Devil No. 032—12 in new type display. 2½ gross in case. Weight 28 lbs.

*On export orders, Model No. 032X will be shipped unless otherwise specified.

Red Devil

**THE ORIGINAL METAL HANDLE
TURRET HEAD GLASS CUTTERS**

No. 48
Price 40c

**Now with Heavily
Plated Finish and
Ball Knob.**

With 6 sharp Red Devil wheels always ready by turning the screw—fitted in one-piece Hardened Turret Head. the redesigned No. 48 Cutter is better than ever for painters and outside workers—also, for production work in window glass factories. Now equipped with heavily plated finish standardized handle, and ball knob for use wherever tapping is advisable.

Quality Features

No. 48—overall length 5"—Red Devil standard design easy finger rest, heavily plated finish, ball knob metal handle—one piece turret head.

Uses Red Devil No. 42 Wheel (See Page 15).

Red Devil No. 48—12 in new type display. 2½ gross in case. Weight 30 lbs.

No. 7
Price 40c

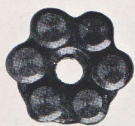

Preferred by many glass workers, is Red Devil No. 7, the original type Turret Head Glass Cutter with mahogany finished wood handle. 6 sharp wheels are always ready in the turret head, which can be turned so as to put the six wheels in action successively by merely loosening the screw holding the turret to the frame.

Quality Features

No. 7—Overall length 5". Polished mahogany finished handle. Six Red Devil Wheels mounted in one piece hardened turret head. Chromium finished.

Uses Red Devil No. 42 Wheel.

Red Devil No. 7—12 in a box. 1 gross in case. Weight 10 lbs.

Six Wheel Turret.
Turret and Axle One Piece.

WORLD FAMOUS GLASS CUTTERS

Red Devil MAGAZINE GLASS CUTTER

PATENTED

Now with Heavily Plated Finish

No. 45

Price 50c

The original metal handle magazine Glass Cutter redesigned for present-day needs. Six extra wheels in reserve are carried in heavily plated finish standardized handle so constructed that the dull wheels

can be easily and instantly changed. An extra heavy ball head for tapping glass is also provided in the handle end. Cutters are shipped with seven wheels.

Quality Features

No. 45—overall length 5"—Red Devil standard design easy finger rest heavily plated finish handle with magazine holding 6 extra wheels. Pregreased.

Uses Red Devil No. 100 or 101 Patented Refill Wheels (See Page 15).

Red Devil No. 45—12 in new type display. 1 gross in case. Weight 18 lbs.

SPECIAL GLASS CUTTER

Now with Heavily Plated Finish

No. 08

Price 20c

This redesigned cutter identical with the new No. 024 except for the special wheel, has been developed for use where the ordinary glass cutter falls down. Specially useful for vitrolite, stippolyte, opalescent and all extra hard glass. Equipped with easy finger rest, heavily plated finish Red Devil standard design handle.

Quality Features

No. 08—overall length 5". All features of No. 024 cutter.

Uses Red Devil No. 241 Special Wheel.

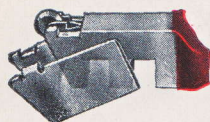

Red Devil No. 08—12 in new type display. 2½ gross in case. Weight 25 lbs.

*On export orders Model No. 08X will be shipped.

Red Devil

REFILL WHEEL GLASS CUTTERS

No. 777

Price 25c

No. 777 Red Devil Glass Cutter was designed especially for the expert glazier for straight cutting or template work. It has chrome plated steel shield to resist template or straight edge wear as well as to allow the user to feel the cut of the wheel without drag on straight edge.

The head of the cutter has been tilted to an angle which brings the wheel in the best possible position for cutting with less pressure than the regular cutter and it enables the user to keep the hand at a comfortable position while cutting. The long reach handle, enameled bright red, has the same comfortable finger rest as other Red Devil cutters, giving the user a well balanced tool easy to use. The expert cutter will appreciate this deluxe tool. Overall length 5".

Uses Red Devil Wheels as follows. (See Page 15 for Wheel Description):

No. 100 wheel for sheet or Fourcalt glass.

No. 101 wheel for plate or polished glass.

No. 102 wheel for hard or art glass.

Red Devil No. 777—12 in display. 1 gross in case. Weight 10 lbs.

PATENTED

No. 888

Price 20c

Refill wheel cutter redesigned with new Red Devil features for glass factories and other large users. The one-piece wheel and axle turns in spring steel holder making a smooth double bearing.

Quality features include: New easy finger rest, heavily plated finish handle, standard for all new Red Devil Cutters. Will outlast a gross of wheels. Long reach head with edge broken for cutting with rule. Overall length 5".

Uses same wheels as No. 777.

Red Devil No. 888—12 in new type display. 1 gross in case. Weight 10 lbs.

No. 999

Price 25c

Many expert glaziers prefer Red Devil No. 999 the 3 notch refill Cutter with mahogany finished wood handle, and polished steel head. All other features similar to No. 888. Overall length 5".

Uses same wheels as No. 777.

Red Devil No. 999—12 in carton. 1 gross in case. Weight 9 lbs.

The new One-Piece Wheel and Axle in the above glass cutters is made from very tough alloy steel with oversize bronze axle. Both wheel and axle slide into steel holder easily. A trial of this wheel developed by Red Devil engineers, will show the very latest in glass cutting smoothness, longevity and economy.

Tube Cutter

Adjustable plain gauge. Cuts glass tubes up to 5". Overall length 7 1/2".

Red Devil No. 035—12 in Box; 1 Gross in Case; Weight 17 lbs.

GLASS DRILL

Red Devil Glass Drills have revolutionized the drilling of glass just as the Masonry Drills (Page 16) have made it possible to drill better, easier holes in all non-metallic construction materials. Harder than the hardest steel—they will fit any Rotary Portable Electric or Hand Drill.

The tungsten carbide—a material closely approaching diamond hardness—solid tips are ground very sharp and long for glass drilling. Bores holes in any position for every glazing need. Absolutely no danger of causing expensive breakage, even in the thinnest glass.

For sharpening instructions—see page 16.

Circle Cutting Machine

This machine, accurately drilled, is designed for rapid, economical production. With it an inexperienced operator can cut accurate circles, without difficulty. Features of this machine are a one piece Turret Head No. 247, with 6 No. 252 wheels; Thumb Screw Adjustment for Crank and Scale; Removable Dust Proof Bearings and Adjustable Stops for centering glass quickly. Rod is scaled in $\frac{1}{16}$ inches; cuts circles $\frac{1}{2}$ inch to $15\frac{1}{2}$ inches.

Red Devil No. 381—1 in carton; Weight $23\frac{1}{2}$ lbs.

Red Devil

HOW TO CUT GLASS

The following instructions, if carefully observed, will enable anyone to cut glass without difficulty.

- First** Wipe off or clean the glass thoroughly before starting. Be sure that the glass is flat and level on the table. If possible use a large piece of felt under the glass.
- Second** Dip the wheel in a light body motor oil, not turpentine. A mixture of one part motor oil and one part kerosene is ideal.
- Third** Place the cutter between the first and second fingers, thumb on underside of handle (see illustration).
- Fourth** Start the wheel on the far side of the sheet of glass from you ($\frac{1}{8}$ " from the far edge)—hold your cutter erect so that the wheel will revolve easily, make a straight, even stroke. The cut must be made continuous across the whole surface or the glass will run to one side.
- Fifth** Press just hard enough to make a fine hair line on the glass. If you press too hard the glass will flake or burn—this is wrong.
- Sixth** Run the cutter wheel entirely across the glass (allow your cutting wheel to drop off the pane).
- Seventh** Use straight edge (brass or wood edge rule) when available, making allowance for $\frac{1}{2}$ width of cutter head when measuring.
- Eighth** To break the glass hold the pane firmly between the first finger and thumb with both hands (side nearest to you) give the glass a slight bend and it will break or "run" the entire length of the cut. (Alternate method—Place end of the cutter handle or wooden match stick under end of cut on side towards you and press down on glass each side of cut with thumb). For breaking off narrow strips use the breaker in the head of the cutter (there are different size breakers for each thickness of glass). For breaking plate or heavy glass use RED DEVIL Glass Pliers, taking pliers up to within $\frac{1}{8}$ " of the cut.
- Tapping the glass gently under the cut will make the glass run or part easier. Always break the glass immediately after cutting as once the cut gets "cold" the glass will not part readily.

NOTES—Do not hold the cutter too firmly. Allow it to rest on the thumb and press gently with the first two fingers on top, until you have pressed sufficiently hard to make a fine hair line.

A glass tool is a precision tool and needs lubrication to work smoothly but do not use turpentine as this will gum up the wheel and axle.

In order to avoid wobbling of the wheel, good glass cutters are made with a very narrow and deep slot and any sticky substance getting into this slot rapidly stops the wheel from turning freely. This deep slot acts as an oil reservoir and all RED DEVIL Glass Cutters are pregreased in this reservoir. This eliminates any necessity of felt wicks or other reservoirs and the RED DEVIL cutter will last almost indefinitely without reoiling.

A clean $\frac{1}{32}$ gallon paint can with cotton or rag in the bottom and just enough light oil in the bottom to cover the cutter wheels makes a very fine permanent holder for your cutters when not in use.

As glass varies in hardness (polished, plate, etc., is soft; opalescent, vitrolite and many window glasses are hard) it is best to use a special cutter for softer glass. A RED DEVIL No. 024 or 023 that has been used or broken in is ideal for use on plate.

No Part of This Page May Be Reproduced Without Written Permission

We are always glad to give advice on any special problems relative to handling or cutting glass. Be sure that you give full name and address when sending any inquiries.

Remember—Red Devil Means Glass Insurance.

Red Devil GLASS CUTTER WHEELS

While we have spent every effort to make the handle and axle better, and to develop refill features, etc., we still feel that the quality of RED DEVIL Glass Cutters stands or falls on the steel wheel itself.

The unequalled quality of RED DEVIL Glass Cutting wheels is recognized throughout the world. This excellence is maintained by constant experimental development and the use of newly discovered alloy metals and recently by the new precision machines developed by us.

As a result of this unremitting effort RED DEVIL Wheels successfully cope with cutting problems presented by the changing characteristics of modern types of glass. The introduction of the smoother RED DEVIL "Long Life" Wheels is an example of how the best can be made BETTER.

Quality Features

- No. 242—"Long Life" Wheel—Best for all around use and for sheet, Fourcalt or Window Glass. This wheel is used in the famous No. 024 Glass Cutter. Fits any single wheel RED DEVIL Glass Cutter—size 7/32" diameter.
- No. 232—"Long Life" Wheel—Best manufactured for Plate and ALL Polished or Smooth Glass. Needs no breaking in. Fits No. 031 and 032 single wheel RED DEVIL Glass Cutters. Size 7/32".
- No. 241—"Long Life" Wheel—Especially manufactured for all hard glass such as Art Glass, Opalescent, etc. Fits No. 08 single wheel RED DEVIL Glass Cutter. Size 7/32".
- No. 252—"Long Life" Wheel—A new small size long life wheel, same quality as No. 242, specially useful for circle cutters and for expert cutting with turret head glass cutters. Fits Nos. 381, 264, 48, and 7 RED DEVIL Glass Cutters. Size 5/32".
- No. 42—A good wheel for turret head glass cutters. Fits Nos. 7 and 48 RED DEVIL Glass Cutters. Size 5/32".
- No. 262—"Long Life" Wheel—Best quality small size wheel—special for tile—used in Old Style No. 509 and 300 RED DEVIL Tile Cutters. Size 5/32".

REFILL ONE-PIECE WHEELS AND AXLES

PATENTED

These RED DEVIL wheels are precision made, the same quality as our new "Long Life" wheels, by our exclusive process. They fit the Nos. 777, 888, 999, and 45 RED DEVIL refill glass cutters. Also Nos. 263, 386 circle cutters, Nos. 509, 301 and 303 tile cutters, etc. Also refill posts for circle machines.

- No. 100—"Long Life" Wheel—Best for all around use and for sheet, Fourcalt or Window Glass. Same wheel as used in the famous No. 024 Glass Cutter. Fits Nos. 777, 888, 999 or 45 Refill RED DEVIL Glass Cutter, also Nos. 263 and 386 circle cutters. Size 7/32" diameter.
- No. 101—"Long Life" Wheel—Best manufactured for Plate and All Polished or Smooth Glass. Fits Nos. 777, 888, 999 and 45 Refill RED DEVIL Glass Cutters, also Nos. 263, 386 circle cutters. Size 7/32".
- No. 102—"Long Life" Wheel—Especially manufactured for all hard glass such as Art Glass, Opalescent, etc. Fits Nos. 777, 888, 999 and 45 Refill RED DEVIL Glass Cutter, also Nos. 263 and 386 circle cutters. Size 7/32".
- No. 98—"Long Life" Wheel—A new small size long life wheel, same quality as No. 100, specially useful for circle cutters. Size 5/32".
- No. 103—"Long Life" Wheel—Special for tile. Fits Nos. 509, 301 and 303 tile cutters. Size 7/32".

Red Devil Nos. 242, 232, 241, 252, 100, 101, 102, 98, per gross. **Price \$14.40**
Red Devil No. 42, per gross. **Price \$ 9.00**
Red Devil Nos. 262, 103, per gross. **Price \$18.00**

Packing: 12 to a glassine envelope, together with the proper axles for use, enclosed in a strong paper envelope with full instructions. Or:—

One gross in a handsome Bakelite Box (illustrated at right).

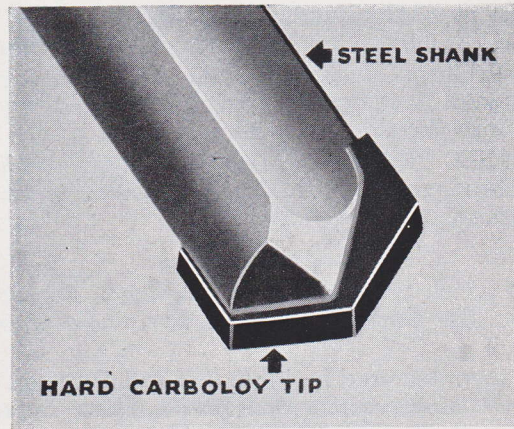

TUNGSTEN CARBIDE MASONRY DRILLS

Red Devil MASONRY DRILLS

NEW

Fits Any
Rotary
Electric
Portable
Drill

Harder than the Hardest Steel—for drilling holes in all Non-Metallic Construction Materials

Drill faster, smoother, more accurate holes with Red Devil Drills because the cutting edge of each drill is tipped with tungsten carbide—a metal closely approaching the diamond in hardness. You use Red Devil Masonry Drills in your Portable Electric Drills in the same way that you have been using ordinary drills but you get more holes per grind, more holes per drill, and do the job in 50% less time!

Red Devil Masonry Drills drill faster, smoother, more accurate holes in all types of concrete, carbon, bricks, marble, slate, limestone, asphalt, tile, asbestos, plasters, wallboard and are particularly recommended for the rapid installation of Expansion Bolt Shields. They will last 50 times longer and will hold a clean cutting edge for weeks of continued use. Absolutely no danger of causing expensive breakage on fragile, brittle material.

Red Devil Masonry Drills (for Glass see Page 11) are a most amazing tool for use in hundreds of applications on construction and maintenance work that no good workman can afford to be without.

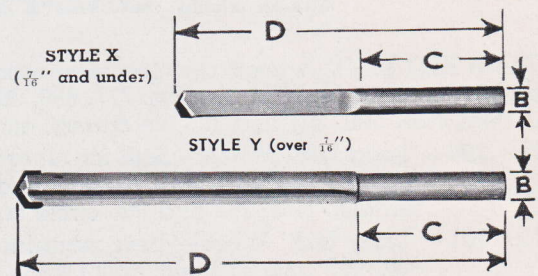

Keep drills sharp—Do not use a drill when it starts to dull and you will get longer life and eliminate breakage.

How to Sharpen—Red Devil Masonry Drills can be sharpened on any tool grinder BUT SILICON CARBIDE WHEELS OF THE GRADE LISTED BELOW MUST BE USED:—Carborundum Wheels 100 S-WHG, 80 S-WHG or Norton Wheel 34100 H + 7.

Observe the following:

1. Do not dip drill in liquids. 2. Use a moderate pressure and keep drill continually moving across the wheel. 3. Keep steel section ground away from tip. 4. Use same angles as for steel drills.

Red Devil

VACUUM CUP GLASS HOLDERS

PATENT APPLIED FOR

No. 408

Price \$7.20

"Put a handle on Glass" by using Red Devil Single Vacuum Cup Glass Holder for small sizes of plate, crystal, window and structural glass, mirrors, granite, marble, etc.

Sturdy construction gives operator positive control of the material on which it has been placed. The lever used to raise the rubber disc to create vacuum or suction is countersunk in the sturdy hand fitting handle when not in use.

No. 408 will do the job easier and quicker—great for one-hand work.

Quality Features

Tool is constructed of cast aluminum which supports the disc and keeps it in rigid position.

When the 4½" cup is properly attached, it is impossible to remove tool without breaking the vacuum.

Easily attached by placing rubber cup on glass surface with lever in upright position and pushing lever down into opposite position.

Red Devil No. 408—1 in box. Weight 1½ lbs.

**No.
407**

Price \$11.20

Uses of the Red Devil Vacuum Cup Glass Holder with "French-phone" grip are practically unlimited, and are equally convenient in the shop or out on the job for setting or holding any smooth surfaced glass or similar material. Will lift 125 pounds or more. Break the suction created by two pieces of glass placed together either in a rack or shipping boxes. Hold mirrors in any position while hanging or fastening to wall. Structural glass can be firmly worked into mastic and placed in desired position, thereby eliminating chipping. Glass shelves or show cases can easily be placed in exact position when setting with cement or felt.

Quality Features

Tool is constructed, similar to No. 408, of cast aluminum which supports the twin discs and keeps them in rigid position.

When the two 4½" vacuum cups, easily controlled by the operator, are attached, it is impossible to remove the tool without breaking the vacuum. When used in vertical position, cups should also be placed in vertical position in relation to each other. Overall length 12½".

Red Devil No. 407—1 in box. Weight 2 lbs.

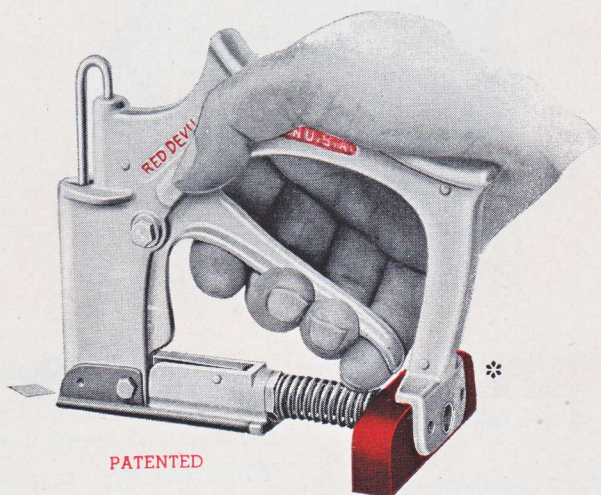

POINT DRIVERS

Red Devil

THE ORIGINAL WORLD'S STANDARD AUTOMATIC POINT DRIVER

Now With Heavily Plated Finish

No. 1
No. 2

**This Tool Glazes Sash and Frames, Mirrors and Pictures
Any Part Can be Replaced or Adjusted by the Operator in Two Minutes**

The Red Devil Patented Automatic is an improved Diamond Point Driver of rugged strength and power. It is now made in a heavily plated finish and has an easily operated coil spring feed, shooting points like a rapid fire machine gun into hardest wood. Unlike other drivers, points can not drop out, due to the patented nose plate. For this reason the driver can be tilted at a sharp angle to drive points for smallest panes of glass, making it a 100% efficient, time saving tool for Sash Manufacturers, Picture Framers, and Glaziers.

This gun allows one man to glaze more sash in an hour than five men by the old hand method with triangle points. It also eliminates the use of brads and nails for picture framing and makes a smooth back picture in jiffy time.

Quality Features

Red Devil No. 1 is the standard for use in glazing sash, No. 2 for reglazing old sash where the wood is soft. No. 2 is recommended for the average picture frame except on very small picture frames where the No. 1 should be used.

Red Devil No. 2 Automatic Driver is the same as No. 1 except that it shoots No. 2 Diamond Points.

Red Devil No. 1 Point Driver (For No. 1 Points which are $\frac{3}{8}$ " long).....**Price \$8.00**

Red Devil No. 2 Point Driver (For No. 2 Points which are $\frac{1}{2}$ " long).....**Price \$9.00**

1 in a Carton, with extra driving plate; 12 in Case; Weight 26 lbs.

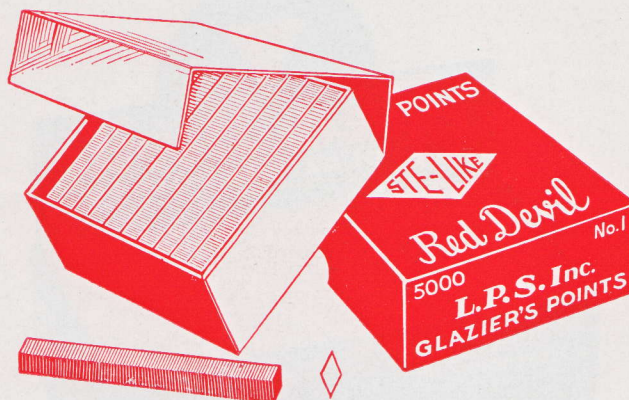

* On Canadian and Foreign orders, Export Model Point Driver (same as illustrated except painted bright red) will be shipped.

Red Devil Automatic Drivers operate in any position—drive points when held at any angle. Points cannot drop out of the Magazine.

Red Devil

STE-LIKE AND PURE ZINC DIAMOND POINTS

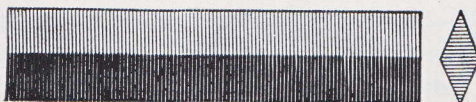

For Glazing Sash and Backing Up Picture Frames, Mirrors, Etc.

Red Devil "Ste-Like" Diamond Points are made by our exclusive process from especially hard metal and slide easily into our automatic Point Driver (Page 18). They are treated against corrosion and can be driven into hardest wood without bending. Ste-Like Points are the highest quality points made today.

We also furnish diamond points of pure hard rolled zinc. Red Devil Diamond Points are absolutely accu-

rate in size and are evenly stacked in strong sticks of 100. These points are the best yet devised for glazing sash or backing up pictures or mirrors. They have a flat broad holding surface and drive into the hardest wood. Our Ste-Like point is a wonderful time saver and does the job better. Red Devil Diamond Points are packed in Special Packages (Patent Applied for), which prevent breaking up of sticks.

Packing

Red Devil, No. 1 Diamond Points ($\frac{3}{8}$ inch long) for No. 1 Driver—Packages of 5,000, contained in Wooden Boxes of either 9 packages (45,000), or 36 packages (180,000); Weight 9 package box, 10 lbs.; Weight 36 package box, 40 lbs.

Red Devil No. 2 Diamond Points ($\frac{1}{2}$ inch long) for No. 2 Driver—Packages of 4,000, contained in Wooden Boxes of 9 packages (36,000); Weight 9 package box, 14 lbs.

GLAZIERS' POINTS

Red Devil

TRIANGLE POINTS IN COUNTER DISPLAY STAND

No. 20

Price 5c

No. 21

Price 10c

Instead of passing out Triangle Points in wasteful loose quantities it pays better to display Red Devil Triangle Points in attractive packages. This idea substitutes sure profit for a sure loss. Every package contains a Point Setter, "Gadget", which makes it possible to drive points with an ordinary hammer or chisel. Packed Zinc Coated, Size No. 2, unless otherwise ordered.

These display boxes of Red Devil Triangle Points have practically replaced the old tack box packing. No. 20 contains a full $\frac{1}{8}$ pound of points,—No. 21 contains full $\frac{1}{4}$ pound points. The point drivers are not added in the weight altho the package sells for the same price as the old tack packing.

Red Devil No. 20—12 packages in Counter Display.
5 Gross of 5c packages in Case; Weight 125 lbs.

Red Devil No. 21—Same style packing as No. 20 except larger and sells for 10c. Packed $2\frac{1}{2}$ Gross Counter Displays in Case; Weight 82 lbs.

Red Devil Triangle Points are furnished of Pure Zinc and Zinc Coated stock in attractive packages of $\frac{1}{8}$ lb., $\frac{1}{4}$ lb., $\frac{1}{2}$ lb., and 1 lb., also 25 lb. and 50 lb. Boxes, and 100 lb. Kegs. Sizes Nos. 00 to 4 inclusive.

This illustration shows U. S. Standard Sizes of Triangle Points.

Price 75c

PATENTED

This is the ideal Red Devil tool for trimming cracks in walls, ceilings, etc. Has a very thin hardened steel refill blade. Also used for cleaning edges of laminated glass before sealing. 7" overall length. 4" handle painted bright red.

Red Devil No. 462—3 in Carton; 1 Gross in Case; Weight 36 lbs.

Extra blades for No. 462. . . . **Price 5c each.**

GLASS PLIERS

Red Devil GLASS PLIER

No. 210

Price \$3.00

Red Devil No. 210 is the finest glass plier developed during the last 30 years and is an exclusive patented "Red Devil" design. The flat upper jaw supports the top surface of the glass, while the humped lower jaw, developing powerful leverage under slight pressure from the handles, cleanly severs the glass to the line cut. This plier will work on any thickness of glass up to and including $\frac{1}{2}$ inch. It takes the place of every plier up to 10 inches and a glass worker requires no other.

Red Devil No. 210, $8\frac{1}{2}$ inch, Full Polished—1 in carton. 6 in box. Weight, per dozen, 12 lbs.

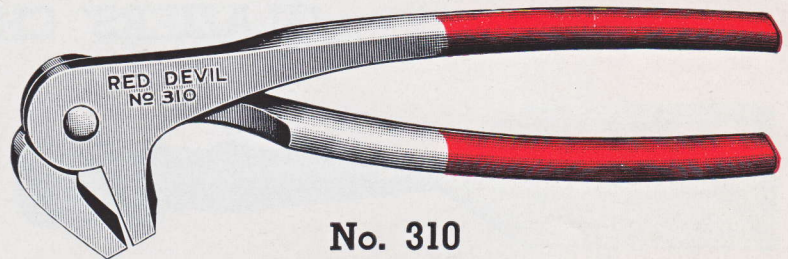

Shown on these 2 pages is the complete line of Red Devil Glass Pliers and Nippers which have been developed by our engineers to fit every possible need of the glass business. A representative selection of these tools should be in the kit of every glass worker.

NEW STYLE OFFSET GLASS PLIER

These Red Devil Pliers were developed by us for store front consumption and wherever it is necessary to get into a corner for breaking glass.

The practical glass man can break or chip plate glass in an upright position with these pliers.

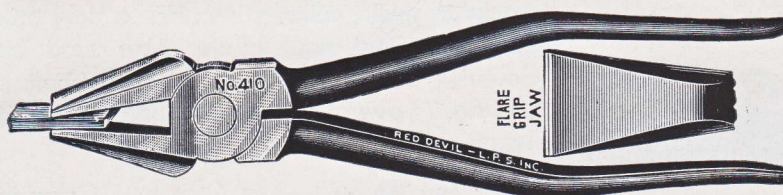

Red Devil No. 310, $8\frac{1}{2}$ inch—Individually wrapped. Weight, per dozen, 12 lbs.

No. 310

Price \$3.00

FLARE GRIP JAW PLIER

No. 410

How To Use The "RED DEVIL" Double Blade Scrapers

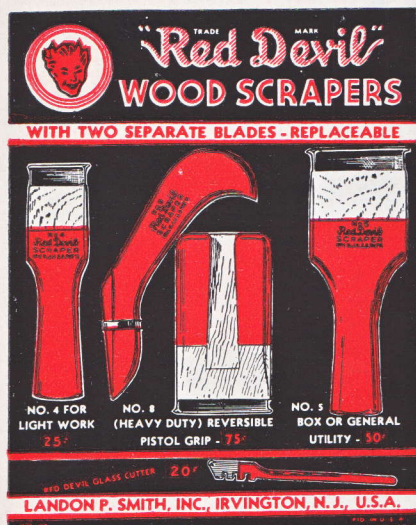

Hold Scraper as illustrated for best results. Always scrape at an angle to the grain of the wood and with the grain if possible. To scrape paint, varnish, etc., bear down only hard enough to remove old material and until the surface is exposed, so that a fine smooth surface is secured. Red Devil scrapers will scrape the paint or varnish from automobiles without the aid of varnish remover, if handled properly.

To sharpen always file against the bevel and keep the original angle. All RED DEVIL scrapers can be sharpened hundreds of times if the handle is securely held in a vise and the proper care is exercised. All Red Devil scraper blades are tempered under file hardness. Use either a scraper file (Page 26) or carborundum stone to sharpen.

TILE CUTTING MACHINES

No. 301

and

No. 303

Packed complete in heavy wooden carrying case ready to take on job.

PATENTED

These Red Devil Tile Cutting Machines are already considered by a substantial portion of the tile cutting trade to be the most desirable machine for on-the-job cutting.

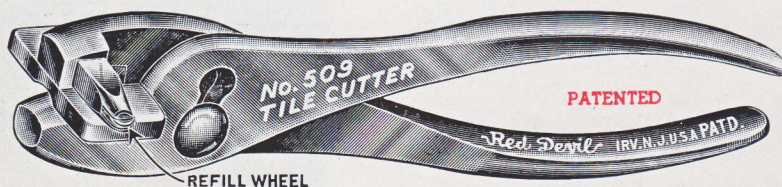

Fitted with new refill wheel which operates on the same principle as the Red Devil refill wheel glass cutters used in glass factories. The breaker works on an entirely new principle, severing the tile cleanly instead of crushing or smashing and is adjustable for all ordinary thickness of tile. A real sturdy machine, all metal, finish aluminum and bright red, all working parts heavily chromium plated.

Uses Red Devil No. 103 Tile Cutting Refill Wheel (see page 15).

Red Devil No. 301 (Makes 8" Cut) 1 in Box, Weight 16 lbs. Price \$30.00

Scalding hot water cannot harm the hand that holds a "Mop" Kitchen Devil Cleaner. Handle also enables one to reach the bottom of milk bottles and other deep utensils that are difficult to scour.
2 dozen in Display Carton. Weight per gross 16 lbs.

For stubborn jobs when hardened grease and clinging cookery fragments must be scoured out of crevices and corners. "Ball" Kitchen Devil Cleaner wins high praise because it can be manipulated by the fingers to reach the hard-to-get-at places.

2 dozen in Display Carton.
Weight per gross 18 lbs.

They Add a Nice New Profit to Each Day's Sales!

Start a stream of profitable dimes flowing into your cash drawer every day with the Kitchen Devil line of modern Pot Cleaners. Give them a chance and they'll keep you sold out.

Best of all, you don't have to stock a large quantity of each style to meet all preferences, for you can, if desired, get 4 styles assorted, in these smart 2 dozen display cartons, illustrated in the lower corner.

Every store needs sellers that customers see, want and buy with no sales talk wasted. Kitchen Devils are IT.

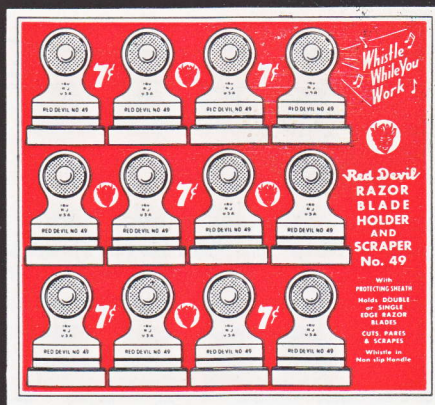

2 Doz. in Display Carton. 4 Styles Assorted. 1 gross in case. Weight 18 lbs.

"Soft as a Dish Cloth on the Hands" is the bright as "Gold" Kitchen Devil Cleaner, illustrated at left. Made of bronze alloy scouring ribbon—an aristocrat of the cleaner family. A cleaner extremely yielding and flexible for effective scouring in the corners. Put up in a colorful cellophane envelope that attracts attention and sales. Any woman who is proud of her soft hands as well as of her shining pots and pans is sure to like this one.

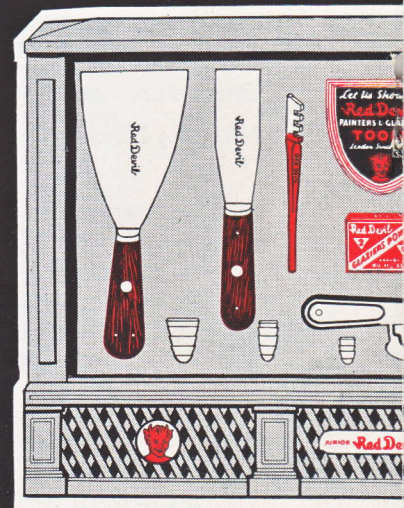

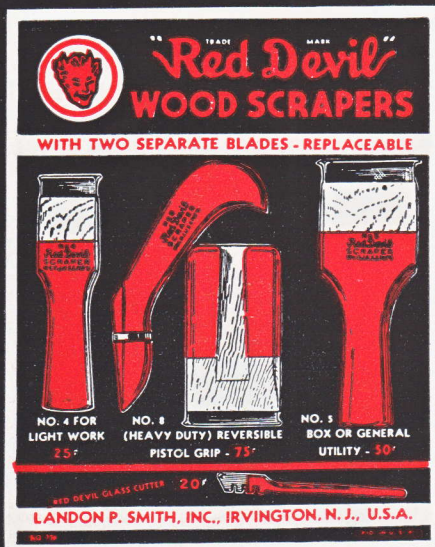

2 Dozen in Display Carton. Weight per gross 14 lbs.

PUTTY KNIVES AND WALL SCRAPERS

THE NEW **Red Devil** P13 PUTTY KNIVES AND WALL SCRAPERS WITH GENUINE **RED TENITE** HANDLES

Red Devil again leads the way! Here is a series of Putty Knives and Wall Scrapers that is the tops for quality, performance and good looks. The fine mirror-bright blades are oil hardened and tempered, and full taper ground under water. They are of the finest steel obtainable for the purpose. The special rivets make each tool a unit that cannot loosen or break apart. The Red Tenite handles (about the handsomest, toughest material made)—created by Eastman Kodak—are new, saleable and the finest ever offered on a painters' tool. The Red Color makes the tools easy to "spot" when mislaid. The P13 line also includes 1 1/8" and 1 1/2" bent putty knives especially designed for steel sash work and 1 1/2" special glaziers' chisel.

Quality Features

Blade—High Carbon Cutlery Tool Steel, Mirror Polished. Oil Hardened and Tempered and Full Taper Ground under water. Etched with Brand and Stock Number. Putty Knives—Square Point. Scrapers—Clip Point.

Handle—Genuine Red Tenite Handle (will not shrink, split, chip or absorb water). Full Oval End. Polished by Hand.

Rivets—Brass Rivets, One Brass Saw.

Packing—1 dozen in Display Box, except P13-1 1/8B and P13-1 1/2B, 1/2 dozen in Display Box.

Red Devil

No. P1 SERIES PUTTY KNIVES AND WALL SCRAPERS

These Red Devil tools are examples of the finest quality that modern equipment and manual skill can produce—mechanics' cutlery at its best. This quality not only embraces materials used but is reflected in every detail of design and finish, including the mirror polished blades. This is a line of uniform design, in all sizes from 1 1/4" to 4" blade width and various blade tempers. It gives the critical mechanic a selection of tools of very highest grade at remarkable values.

Quality Features

Blade—High Carbon Cutlery Tool Steel, Mirror Polished. Oil Hardened and Tempered and Full Taper Ground under water. Etched with Brand and Stock Number. Putty Knives—Square Point. Scrapers—Clip Point.

Handle—Genuine Nicaraguan Cocobolo. Full Oval End. Wax polished by hand.

Bolster—White Alloy. Cast through Tang of Blade.

Rivets—Two Brass Pins, One Brass Saw.

Packing—One dozen in Display Box.

PUTTY KNIVES AND WALL SCRAPERS

Red Devil

No. P3 SERIES PUTTY KNIVES AND WALL SCRAPERS

This group of Putty Knives and Wall Scrapers is one of superior quality. It differs from the Red Devil "de luxe" P1 series only in details of construction and finish which do not in the slightest degree affect the service which may be expected from these tools. Fine glaze finish blades and no bolster style cocobolo handles are the points of difference.

Quality Features

Blade—High Carbon Cutlery Tool Steel—Glaze Finish. Oil Hardened and Tempered and Full Taper Ground under water. Etched with Brand and Stock Number.

Putty Knives—Square Point.

Scrapers—Clip Point.

Handle—Genuine Nicaraguan Cocobolo. Full Oval End. Wax polished by hand. (No bolster style.)

Rivets—Three Brass Pins, One Brass Saw.

Packing—One Dozen in Display.

Red Devil

No. P5 SERIES PUTTY KNIVES AND WALL SCRAPERS

The P5 series Knives are exactly the same in quality, workmanship and finish as those which comprise the Red Devil P3 series shown on the preceding page except for the wood used in the handles. These P5 Knives are hafted with handles of hard kiln dried New England Beech, which positively will not check, and which many mechanics prefer because of its neat appearance and "non-slipping" grip. Made in all sizes, 1 1/4" to 4", stiff and flexible.

Quality Features

Blade—High Carbon Cutlery Tool Steel—Glazed Finish. Oil Hardened and Tempered and Full Taper Ground under water. Etched with Brand and Stock Number.

Putty Knives—Square Point.

Scrapers—Clip Point.

Handle—Genuine Kiln Dried Beech. Full Oval End. Smooth sanded finish. (No bolster type.)

Rivets—Three Brass Pins, One Brass Saw.

Packing—One Dozen in Display.

PUTTY AND BURN-OFF KNIVES

Red Devil

PUTTY KNIFE AND SCRAPER

Extra Heavy Taper Ground

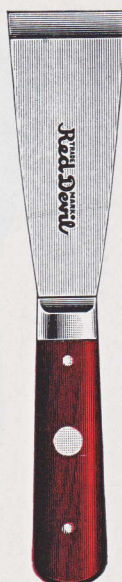

Designed for the mechanic who wants a real "he-man" Red Devil tool and who will not be satisfied unless he gets the best. The blade is of carefully hardened tool steel and is handsomely mirror polished. The handle is solid Nicaraguan Cocobolo, wax polished by hand and securely pinned through the tang of the blade. Mounted with extra heavy solid brass ferrule.

Packing: 1 dozen in a box.

No. P15-1½, Blade 1½" Extra Heavy Taper Ground, Wt. Per Doz. 2 lbs. 1 oz. **Price 55c**

P15

P1 ½C

PUTTY SPREADER

Extra Heavy. Straight Ground.

Finest quality throughout. Extra heavy hardened tool steel blade, uniform in thickness from the handle to the end. Mirror finished. Handle is of 2-piece (scale) construction genuine hand polished Nicaraguan Cocobolo, permanently fixed to the blade tang by 2 brass pins and 1 large brass compression saw rivet. Lap type, heavy alloy bolster.

Packing: 1 dozen in a box.

No. P17-1¼, Blade 1¼" Extra Heavy Straight Ground, Wt. Per Doz. 4 lbs. 1 oz. **Price 45c**

NOTE: This tool is regularly furnished with chisel point. If full blunt point is wanted, specify No. P17-1¼B.

P1-1½C is the same as Red Devil P17 with the exception of the Full Oval End handle, and taper sided blade. Long bevel chisel point.

Packing: 1 dozen in a box.

No. P1-1½C, Blade 1½" Extra Heavy, Wt. Per Doz. 3 lbs. 4 oz. **Price 50c**

P17

BENT KNIFE

For Steel Sash Work

A Red Devil "Natural" for steel sash work and filling cracks in floors, pointing up wall board joints, "spachtling" trim, etc. Tempered tool steel blade ground to have the right "hang," hand polished scale tang cocobolo handle, 2 brass pin rivets, 1 large brass compression saw rivet, white alloy bolster.

Packing: 1 dozen in a box.

No. P19-1⅞, Blade 1⅞" Bent, Wt. Per Doz. 2 lbs. 2 oz. **Price 65c**

No. P19-1½, Blade 1½" Bent, Wt. Per Doz. 2 lbs. 6 oz. **Price 69c**

P19

BURN-OFF KNIFE

New Style. Long Handle

No more burned fingers — no more barked knuckles — if these new style Red Devil "Burn-off" Knives are used. The 7½" long handle keeps hands away from scorching contacts when working with a torch — also prevents skinned knuckles when working under a radiator because of the long reach afforded. It adds another foot to any man's reach and saves shifting ladder or planks so often. Hardened and tempered taper ground tool steel blade. Clip point. (Stiff only.) 7½" long beech handle slotted to receive tang of blade. 3 large brass compression saw rivets.

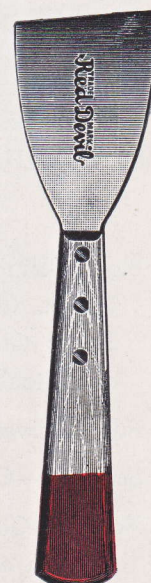

Packing: ½ dozen in a box.

No. P25-2½, Blade 2½" Stiff, Wt. Per Doz. 4 lbs. 14 oz. **Price 75c**

No. P25-3, Blade 3" Stiff, Wt. Per Doz. 5 lbs. 4 oz. **Price 80c**

No. P25-3½, Blade 3½" Stiff, Wt. Per Doz. 5 lbs. 6 oz. **Price 85c**

No. P25-4, Blade 4" Stiff, Wt. Per Doz. 5 lbs. 11 oz. **Price 90c**

P25

Red Devil

PUTTY KNIFE

For Household and Odd Job Use

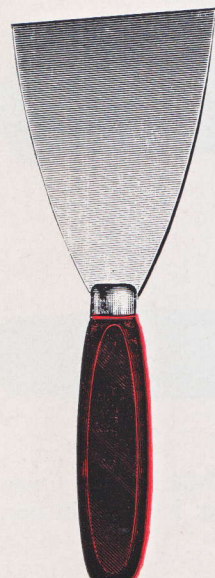

Good quality Putty Knife for household and "odd job" use. Widely employed by garage mechanics for removing carbon and for general use around automobiles. High carbon, saw steel blades, closed end nickel plated ferrules, genuine hardwood handles—choice of two finishes.

No. P100—1-3/16" Semiflex Blade, Natural Varnish Handle, Weight per doz. 1 lb. 1 oz. **Price 10c**

No. P102—1-3/16" Semiflex Blade, new Oval Colofuse Handle. Weight per doz. 1 lb. 8 oz. **Price 10c**

P100 & 102 Minimum Shipping Quantity — 1 gross carton.

Red Devil Wall and Utility Scrapers are particularly useful around the house or garage and are companion numbers to P100 and P102 Putty Knives described above. Bright finished cold rolled steel blades—deep slotted nickel plated ferrules, full size hardwood handles—two finishes.

P107

WALL AND UTILITY SCRAPER

P101
P-102-3

PUTTY KNIFE

Outstanding Value In Its Class

The finest Putty Knife on the market at anywhere near the price! Genuine hardened and tempered tool steel blades, carefully ground and polished. These Red Devil Knives have working qualities and will give service equal to the most expensive. Brown varnished hardwood handles. Closed end nickel plated ferrules. Choice of two blade tempers.

No. P104S—1 1/4" Semi Stiff Blade, Brown Varnish Handle. Weight per doz. 1 lb. 1 oz. **Price 15c**

No. P104F—1 1/4" Flexible Blade, Brown Varnish Handle, Weight per doz. 1 lb. **Price 15c**

No. P101—3" Stiff Blade, Natural Varnish Handle, Weight per doz. 2 lbs. 5 oz. . **Price 10c**

No. P102-3—3" Stiff Blade, new Oval Colofuse Handle, Weight per doz. 2 lbs. 12 oz. **Price 10c**

Minimum Shipping Quantity—1 gross carton.

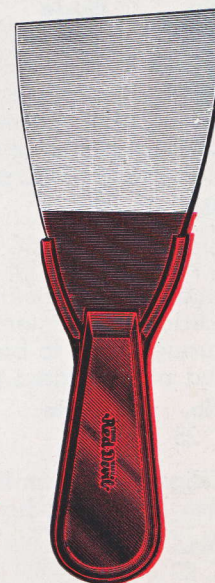

P104

WALL SCRAPERS

Red Devil P107 is a quality Wall Scraper. Genuine hardened and tempered tool steel blades. Clip point; taper ground under water and glaze polished. This popular scraper will do every job you would expect from a tool costing twice as much. Deep slotted nickel plated ferrules. Hardwood handles with baked enamel finish.

Red Devil P103 (Old No. 288) is a mechanic's Scraper at the price of a household tool. Patented invention welds the blade and handle into one piece without the use of rivets. The blade simply cannot come loose and you can't split that steel bound handle. Notice that the steel guards make the blade bend (when working) across the red line, not at the handle where the ordinary knife is weakest.

No.	Blade	Handle Finish	Wt. per Doz.	Price
P107S	3" Stiff	Red Enamel	2 lbs. 1 oz.	25c
P107F	3" Flexible	Red Enamel	1 lb. 8 oz.	25c

Red Devil

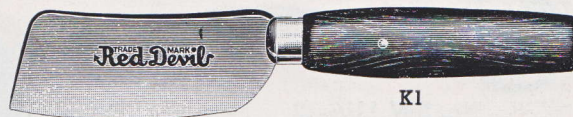

PAPER HANGERS' KNIVES

The special 90/100 point carbon tool steel, coupled with the most careful heat treatment and painstaking grinding under water produces in these Red Devil Paper Hangers' Knives just the right professional working qualities. The blades are ground taper from handle to point to give them "hang" and flexibility and they are tapered from back to the keen edge to make them free cutting and easy sharpening. The varnished hardwood handles are pinned through the blades, and will not come off. Closed end nickel plated ferrules make it easy to keep clean of paste. Medium size blades in three standard shapes. Packing: One dozen in a box.

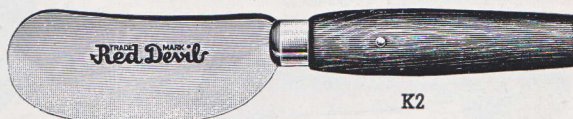

No.	Blade	Wt. Per Doz.	Price
K1	3 1/4 x 1 3/8 Square Point	1 lb. 1 oz.	35c
K2	3 1/4 x 1 3/8 Round Point	1 lb. 1 oz.	35c
K3	3 1/8 x 1 1/8 Clip Point	14 oz.	35c

For mechanics who prefer the larger size blades, we offer these Red Devil Knives in square and round point style. Genuine hand burnt maple handles on these tools. Special tool steel blades, double taper ground. Pinned handles, deep slotted closed end nickel plated ferrules. The finest type of cutlery. Packing: One dozen in a box.

SEAM ROLLERS

R1-R11

R2-R12

In these Red Devil Paper Hangers' Seam Rollers, we have tried to produce good mechanics' tools, free from so-called "improvements" and at a reasonable price. We haven't yet found a better material for a Seam Roller than good old-fashioned kiln dried New England rock maple, provided the working surfaces are hand rubbed and polished as ours are and not just dipped in shellac. Steel axle pins driven right through the rollers will never come out and you can't break the nickel plated one-piece combination fork and shank. Double scored varnished handles, sealed nickel plated ferrules. Packing: 1/2 dozen in a box.

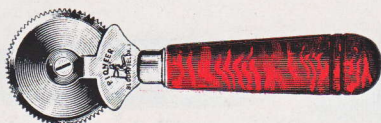

No.	Roller	Wt. Per Doz.	Price

CORNER KNIFE

Mechanics quickly appreciate the many features of the Red Devil line of Paper Hangers' Casing Wheel Knives. Wheels made of the finest cutlery tool steel are individually hardened and tempered in oil.

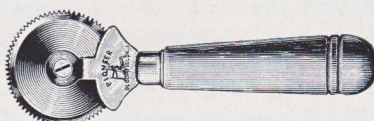

The central illustration shows three types of wheel edges furnished. The wheel of the corner knife is mounted on a genuine cutlery steel paper hanger's knife blade.

All wheels are surface ground and have hollow ground edges. The genuine bronze bushing forged in the wheel center insures accurate running and long life. Steel axle screws and locking nuts give finely adjustable running clearance. Colofuse handles, plated forks, closed end plated ferrules. Packing—1 dozen in Box.

Red Devil
New High
Grade Line
Profit Deal
for You

No. 213

There's "Jack"
In This Box

DEALERS PAY \$13.³³ AND TAKE IN \$21.³⁰

A customer for a Putty Knife or Wall Scraper will buy either a low priced tool at small profit to you, or a high grade tool carrying a much larger profit.

So it means something to your income just what grade of tool this customer does buy—and it pays to do something about it—at least to make sure that he is shown the better Red Devil tools first, or, that they be displayed where he can see them.

In short, sell the highest grade putty knives and scrapers in an attractive display right down on the counter, in plain sight, with a price on them, instead of digging them out of their hiding places.

You can explode this old fallacy about "quality" goods and make some money out of it by trying this new and profitable Red Devil Deal, which features Red Devil Putty Knives and Scrapers of the finest grade, which have real tool steel blades, oil hardened and tempered, taper ground and etched and genuine cocobolo handles. They are displayed in the successful manner that thousands of dealers have found highly profitable in selling other Red Devil Products.

Coarse, Medium and Fine for

Wood; Emery Paper for

Metal Work

Red Devil "Handy Pack" Sandpaper and Emery Paper is useful in a thousand ways to housekeepers, handy men, glaziers and mechanics. It scours rust and grease from stove tops, pots and pans, cleans and smooths floors, trims furniture for painting or varnishing, removes rust from tire rims of automobiles, tools, etc.

The homemaker, painter, woodworker and anyone using sandpaper in small quantities wants and will buy this Red Devil Handy Pack. No. 24 contains a liberal supply, 20 sheets and No. 23 contains 8 sheets, enough for the man with one small job who would ordinarily not bother to buy sandpaper.

Best quality sandpaper and emery paper—full size sheets—full count—packed in the most attractive 2 color display package on the market.

Red Devil "Handy Pack" Sandpaper fits Nos. 9 and 9a Sandpaper Holders (Page 45) but can be used without the holder.

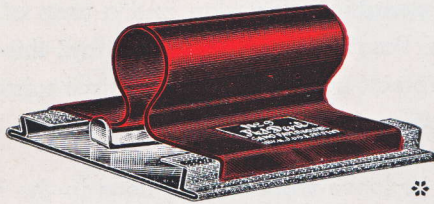

Red Devil No. 23—2 dozen in display carton; 4 gross in case; weight 72 lbs.

Red Devil STEEL WOOL HOLDER

PATENTED

No. 17

Price 25c

Red Devil Steel Wool Holder is a quick seller. With it, pressure can be put on a surface without penalty of lost skin and a crop of irritating steel splinters in the flesh. Painters and decorators find this holder a most welcome tool, as it protects hands against chemical solutions used in removing old paint—making for easier and faster work.

Either standard size pads or loose wool can be used in the Red Devil holder, which is made of stiffly flexible rubber. Insert by pressing the sides upward with the fingers, whereupon spikes, set in the underside, open to seize the wool, which is then locked fast as the sides spring back to normal position. Shipped complete with large pad of steel wool.

Red Devil No. 17—1 dozen in display carton. 1 gross to case. Weight, per gross, 48 lbs.

PAINTERS' TOOL KIT

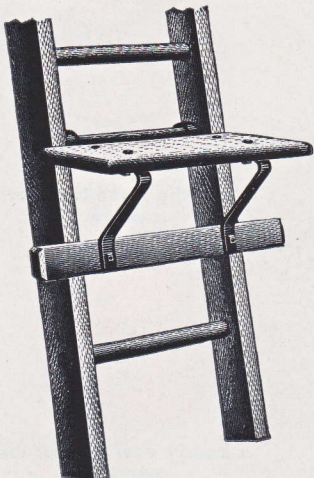

One of the attractively boxed group of Red Devil gift sellers for all seasons. Kit consists of 1 each No. 5 Wood Scraper, P 1-1 $\frac{1}{4}$ " Flexible Putty Knife, P 1-3 $\frac{1}{2}$ " Flexible Wall Scraper and No. 777 Glass Cutter.

LADDER STEP

The Red Devil Ladder Step is carried up the ladder and easily hooked on the rung. Just the thing for carpenters, painters, and other craftsmen who will appreciate a comfortable, flat surface on which to stand instead of having the ladder rung on the instep of the foot. Also very popular for use by fruit growers.

Red Devil No. 66—1 in container. 12 in case. Weight 72 lbs.

Red Devil PAINTERS' KIT

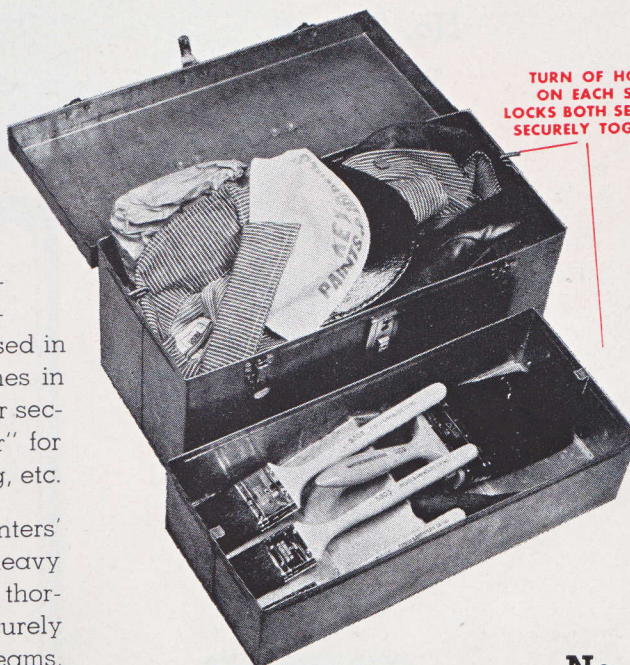

Here, at last, is a rugged KIT specially designed for the PAINTER. Plenty light enough to carry — strong enough to dump into the back of the car. No sharp corners. Separate bottom section has welded compartment, raised in center, to hold brushes in proper position. Upper section acts as a "locker" for the change of clothing, etc.

Red Devil No. 67 Painters' Kit is made of strong heavy gauge full turn steel, thoroughly rust proof. Securely riveted corners and seams, comfortable carrying handle. Three snap locks and cabinet lock with two keys.

Size of Kit is $18\frac{3}{8}$ " x $12\frac{1}{8}$ " x $8\frac{1}{2}$ ".

Red Devil No. 67—1 in a box. Weight 9 lbs.

Red Devil Roller Stiplers, now available in 4 sizes, completely cover every stippling and stenciling need. All have mirror-bright handles heavily nickel plated, permanently attached to hardwood rollers by means of free moving bearings. Handgrips shaped to fit the hand, are supplied in a new, beautiful colofuse finish on the Nos. 27, 29 and 47 models. A necessity for every good workman.

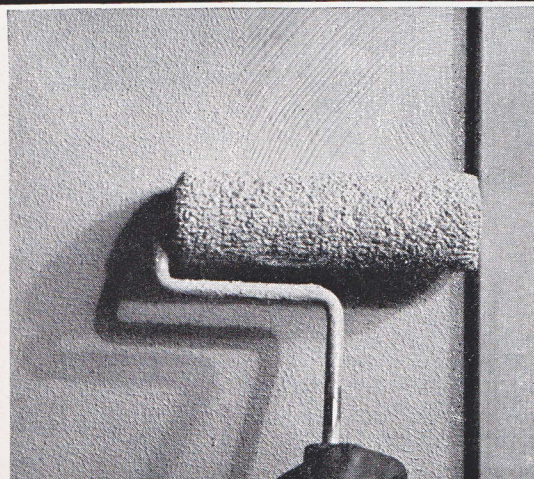

Red Devil

ROLLER STIPPLER CUTS STIPPLING COSTS 70%

Those long hours and tedious efforts spent brush-stippling are over at last. Estimates and equipment costs reduced and workmanship improved when you use a Red Devil Roller Stippler.

More beautiful painted walls and ceilings are assured because the stippling created by Red Devil Roller Stipplers is always perfectly uniform. Work equally well with flat or gloss. No brush marks show—no laps, joints, or holidays, no flat blotched ceilings. As there is no pounding, plaster is not loosened and cracks are not opened. Colors can easily be changed on the job without any fuss or bother by simply removing cotter pin and replacing wood roller and cover or by replacing cover on same roller. The pound, pound of the stippling brush is replaced by a simple effortless rolling motion that brings out the full value of the stipple design without mess or fuss.

The same Stippler is used for fine and coarse stippling. The fine stipple is obtained by applying paint and brushing out well before stippling. The thinner the coat of paint, the finer the stipple. A heavier coat will produce a coarser stipple.

Gets right up close to door and window casings, moldings and baseboards, behind radiators, into niches and corners.

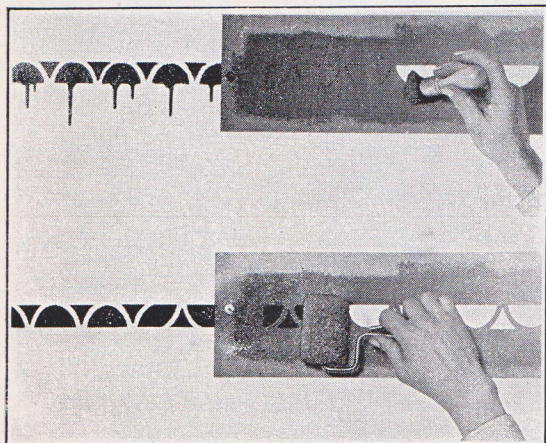

How to Use the Red Devil Roller Stippler

Apply paint to the roller using a paint brush to spread the paint at all times. Roll the roller back and forth on paper until the paint is uniform and excess lint is removed. A pronounced sucking sound is noticeable when roller is ready to operate—when sucking sound stops apply more paint.

The paint on walls or ceiling should be allowed to set slightly before stippling.

Apply the roller to painted surface in any direction, preferably up and down on side walls and back and forth in one direction on ceilings. Use only the slightest pressure. As the roller distributes paint as it rolls, the same care need not be given the uniformity of paint on the walls, as when a stippling brush is used.

Additional complete and detailed instructions are supplied with each set or will be mailed upon request.

Stenciling: The No. 25 Red Devil Roller Stippler with the 3" long cover is recommended for stenciling.

Red Devil No. 27 "Standard" Roller Stippler with No. 28 Cover, Length overall 13"; Roller 6½". 1 to a box. Weight 17 lbs. per doz.

GLASS SCRAPERS

Red Devil

RAZOR BLADE HOLDERS AND GLASS SCRAPERS

PATENTED

No. 13

Price 10c

It is generally recognized that an old razor blade, in a suitable holder, cannot be surpassed as a scraper for many purposes.

Latest and best in this type of tool is the Red Devil Jak-Nife. It combines a strong, effective scraper and a handy cutter that folds into itself like a jack knife (as shown in the illustration) to enclose a blade, thus insuring utmost safety and convenience in handling. Uses as a scraper include cleaning paint or labels off glass, or other surfaces, and as a cutter—cutting Wall Paper, Wrapping Paper and other materials.

A sturdy, well made, plated finish practical tool that will sell on sight.

Red Devil No. 13—12 in display (see below). Weight per dozen 1 $\frac{3}{4}$ lbs.

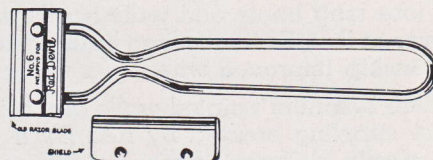

No. 49

Price 7c

You will certainly "Whistle While You Work" (found in the non-slip handle) when you use the Red Devil No. 49. A convenient hand tool with protecting shield, fitted with new single edge "Red Devil" blade. Small and compact, easy to hold, making it ideal for removing stickers from windows and getting into corners.

Red Devil No. 49—24 on display. Weight 2 lbs.

No. 6

Price 10c

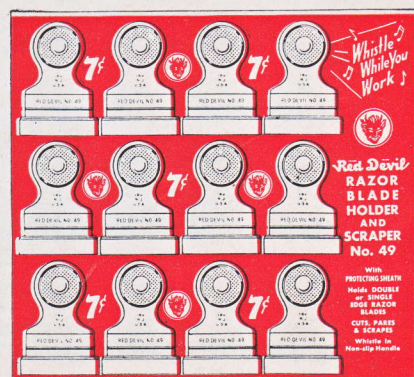

Using single or double edged blade, this handy Red Devil Scraper removes paint from window glass—likewise has innumerable other mechanical and household uses. The blade is gripped snugly by the holder. A shield snaps on over the blade for protection when not in use. The tool is 6 inches long, with nicked finish. Shipped complete with shield and one blade.

PUTS PEP IN YOUR PAINT

**RED DEVIL
ELECTRIC PAINT CONDITIONERS**

PAINT CONDITIONERS (2 TO 5 GALLONS)

In response to many requests from our customers who have been successfully using the Red Devil No. 30 Paint Conditioner, we now offer the No. 33 machine designed for conditioning paint in 5 gallon cans and for other suitable uses.

This unit features a three-way motion represented by (1) an outward stroke of the shaft, (2) upward stroke, and (3) a downward stroke creating an agitation inside the can that literally tears pigment apart and thoroughly mixes it with the vehicle.

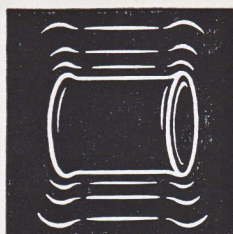

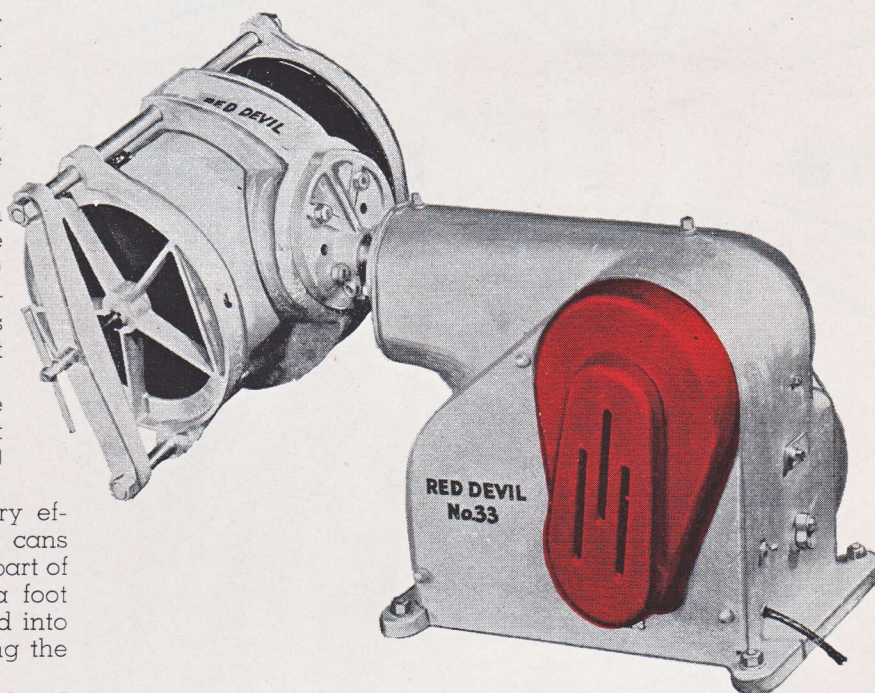

Aside from this new third motion the machine is designed and styled almost identically with the smaller size No. 30 machine, and features:

Greater speed in operation and a very efficient holder which facilitates getting cans in and out of the machine. The bottom part of the No. 33 holder is equipped with a foot pedal which permits cans to be pushed into position with a minimum of effort, using the regular bale for all handling.

Rich in eye value—modern and streamlined appearance.

Compact and durable—all parts made to withstand the shock of reasonable overload. The motor in the No. 33 is completely enclosed but easily accessible. All mechanism, except the motor operates in a bath of oil and requires no other attention than an occasional glance at the oil gauge.

The use of this and other Red Devil Paint Conditioners has saved painters, decorators, and householders thousands of hours hand labor and the paint industry as a whole has benefitted immeasurably through the elimination of complaints, costly paint replacements, involving transportation expense to and from factory, and other nuisances for which a manufacturer is usually held responsible.

To accelerate the work of conditioning very old paint, the holder is adjustable for three distinct positions when can is being shaken—upright, sideways, and upside down. To attain these positions it is only necessary to press a lever and whirl the can into the location desired before turning on the operating switch.

Red Devil No. 33

Base measurements—11 $\frac{3}{4}$ " wide—19 $\frac{3}{4}$ " long—30" high—operating space 39" x 15 $\frac{1}{2}$ ".

Motor equipment— $\frac{1}{3}$ H.P. 60 cycles 110 Volts, A.C., unless otherwise specified.

Shipping weight—375 lbs.

Packing—Completely assembled and mounted on skid, 4 lag screws supplied for fastening to floor through rubber shock absorbers.

Paint Conditioner Decalcomanias, Window Streamers, and Metal Panel for Junior Billboard are available. See Pages 51, 62 and inside Back Cover.

**NOW FOR
5 GALLON
CANS**

THE NEW RED DEVIL No.

PAINT CONDITIONERS (2 TO 5 GALLONS)

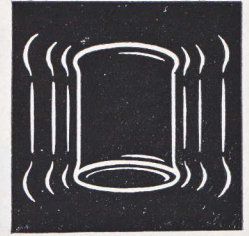

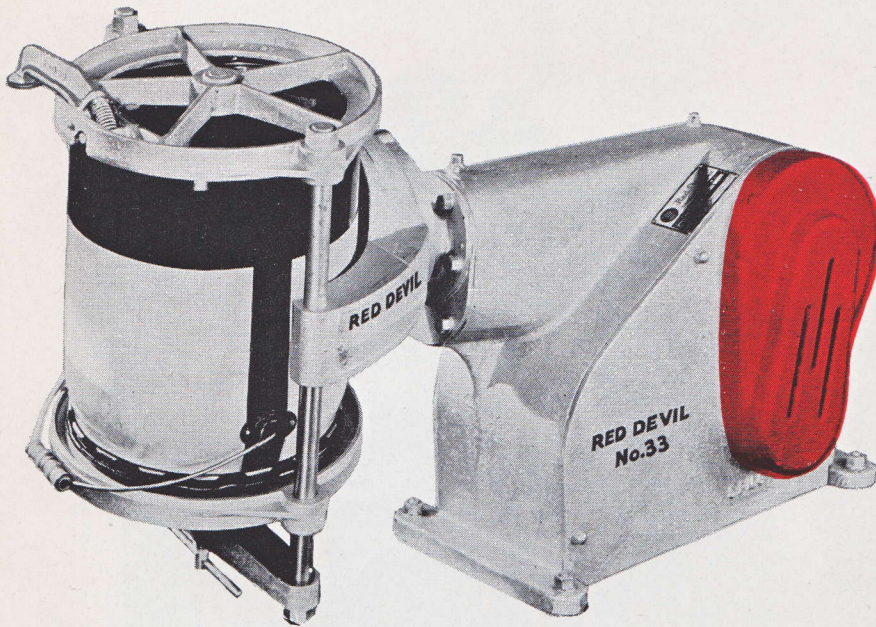

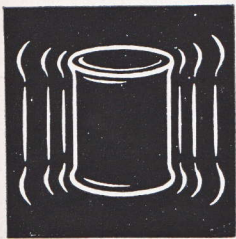

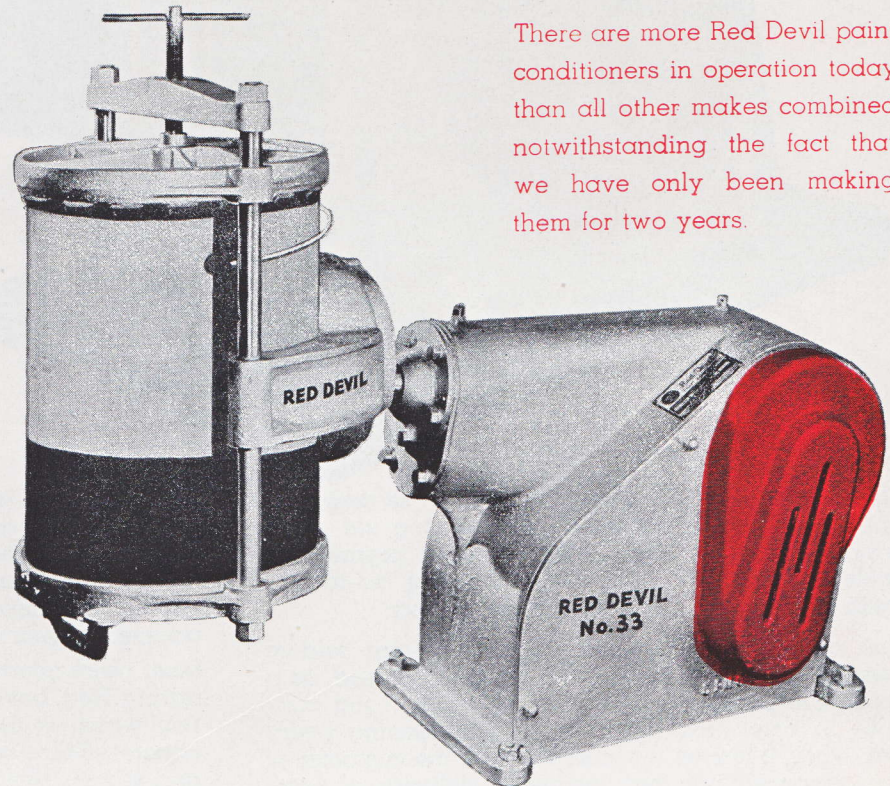

Illustration to the left shows can in upside down position. Pigments in paint have a natural tendency to sink to the bottom of the can, thus a conditioning in this position is advisable for paint that has been in stock for any considerable period.

Showing the position of can when it is first placed in holder in upright position. Note foot pedal on bottom of holder which releases base of can and enables it to slide in or out when top handle is loosened slightly.

There are more Red Devil paint conditioners in operation today than all other makes combined notwithstanding the fact that we have only been making them for two years.

33 PAINT CONDITIONER

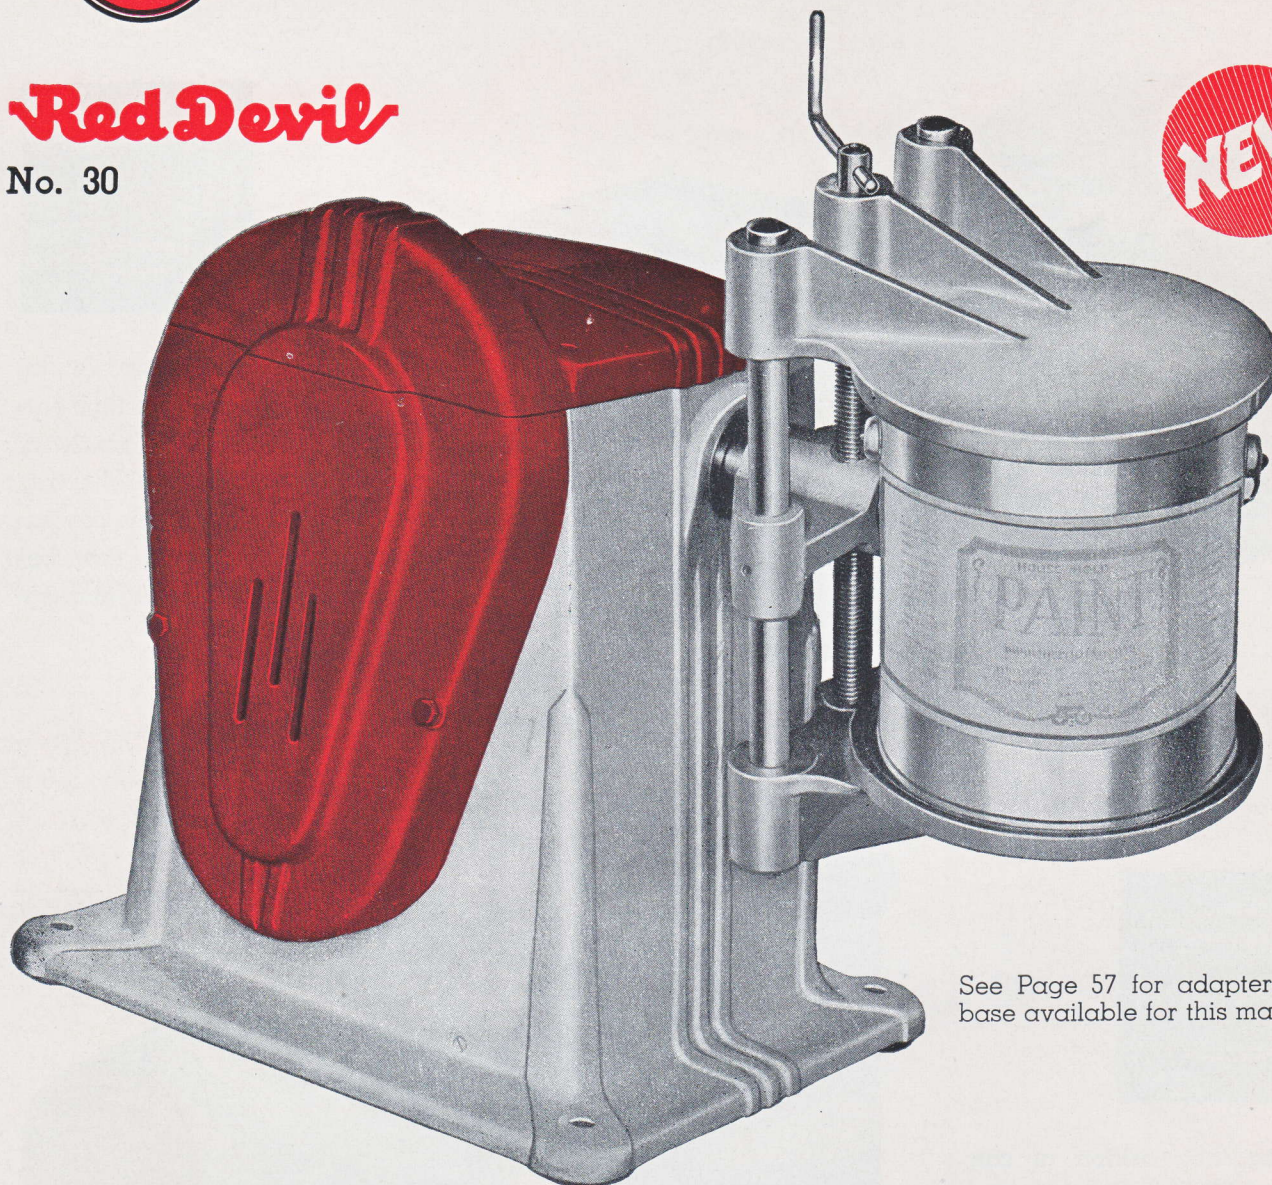

PAINT CONDITIONERS ($\frac{1}{4}$ PINT TO 1 GALLON)

Red Devil

No. 30

NEW

See Page 57 for adapters and base available for this machine.

The Red Devil No. 30 Paint Conditioner is designed not only for the purpose of rejuvenating old paint which has stood on shelves allowing pigment to settle in the can, but also for conditioning "so-called" fresh stock that is inclined to settle quickly.

The average householder who buys paint seldom takes enough time to properly hand stir it, and, as a result the paint, when applied is "runny" and variable in color and consistency. Conditioning every can when it leaves the store relieves the customer of this responsibility and insures a delivery of paint which is as fresh as when it leaves the factory.

With its patented exclusive speedy two-way eccentric motion, which allows 1350 strokes per minute, the No. 30, or other Red Devil Paint Conditioners, will mix pigments thoroughly and condition paint faster than any other machine on the market. The patented holder and clamp is easy to operate. Double action screw on holder makes it possible to

exchange cans in a matter of seconds. The patented holders firmly gripping cans from top and bottom (instead of sides) without soiling or marring, are nested to hold any size can from $\frac{1}{4}$ pint to 1 gallon (U. S. and Imperial Standard) and by using the adapter, 4 quarts or pints may be serviced at once.

Most users advance these important reasons for preferring Red Devil No. 30:—Greater speed in operation which is most essential when waiting on customers.—More attractive in appearance.—Compact and sturdy. Motor is completely enclosed but easily accessible. Mechanism operates in a bath of oil requiring only an occasional glance at the oil gauge.

Red Devil No. 30

Base measurements— $12\frac{1}{2}$ " wide, $14\frac{1}{2}$ " long, $19\frac{1}{2}$ " high—operating space 13 " x $21\frac{3}{4}$ ". Motor equipment— $\frac{1}{4}$ H.P.—60 Cycle, 110 Volt, A.C., unless otherwise specified.—Shipping weight, 140 lbs. Packing—Completely assembled, mounted on skids.

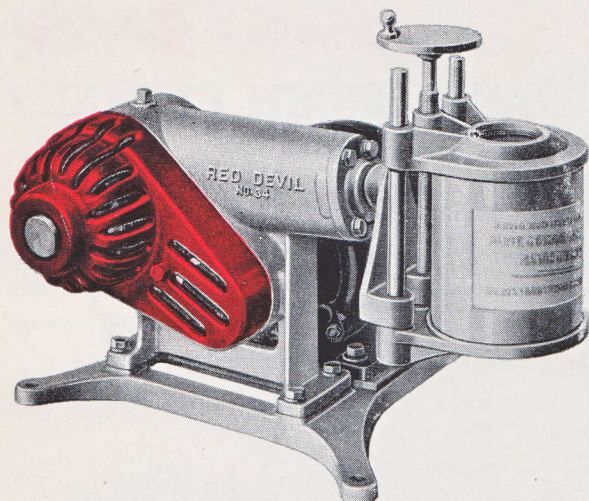

PAINT CONDITIONERS ($\frac{1}{4}$ PINT TO 1 QUART)

NEW

Red Devil

No. 34

Red Devil No. 34

Base measurements—12" wide, 13" long, 15" high. Operating space $17\frac{3}{4}$ " x 14".

Motor equipment— $\frac{1}{6}$ H.P.—60 Cycle, 110 Volts, A.C. unless otherwise specified.

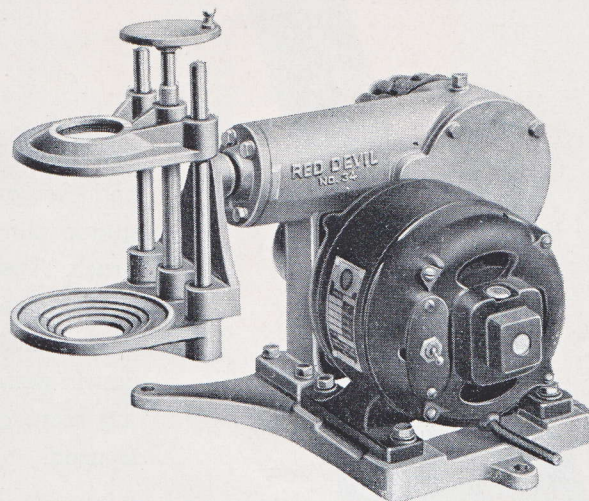

Shipping weight—60 lbs.

Packing—Completely assembled and mounted on skids with 4 lag screws.

Paint Conditioner Decalcomanias, Window Streamers, and Metal Panel for Junior Billboard are available. See Pages 51, 62 and inside Back Cover.

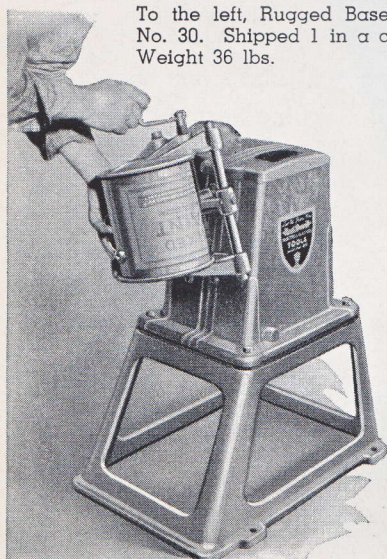

This new Red Devil No. 34 Paint Conditioner will handle all size cans from $\frac{1}{4}$ pint to 1 quart (U. S. and Imperial Standard). It has the same scientific three-way motion that is incorporated in our No. 33 for 5 gallon cans, with a novel holder, which not only handles standard sized cans but bottles and off-shape cans as well.

The machine is light enough to be installed on a counter or strong table where customers can see it operate. The small dealer who handles more small cans than large will find this machine desirable. The large dealer will find an extra Red Devil No. 34 useful at the retail counter as a time saver. Printers who mix small batches of ink will also welcome this equipment. Also fine for leather dyes, mayonnaise, etc.

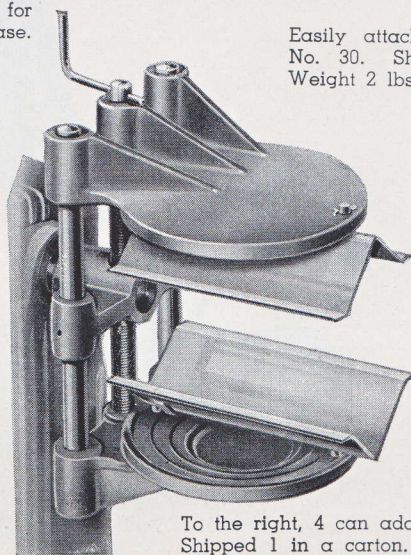

ACCESSORIES FOR THE No. 30

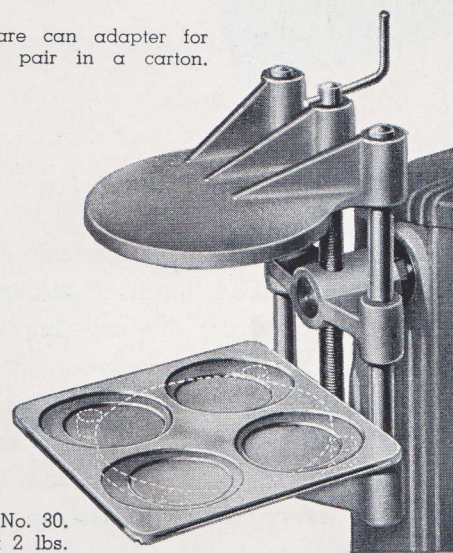

To the left, Rugged Base for No. 30. Shipped 1 in a case. Weight 36 lbs.

Easily attached square can adapter for No. 30. Shipped 1 pair in a carton. Weight 2 lbs.

To the right, 4 can adapter for No. 30. Shipped 1 in a carton. Weight 2 lbs.

PAINT BRUSH CLEANER

NEW

Red Devil

PAINT BRUSH CLEANER

PAT. PEND.

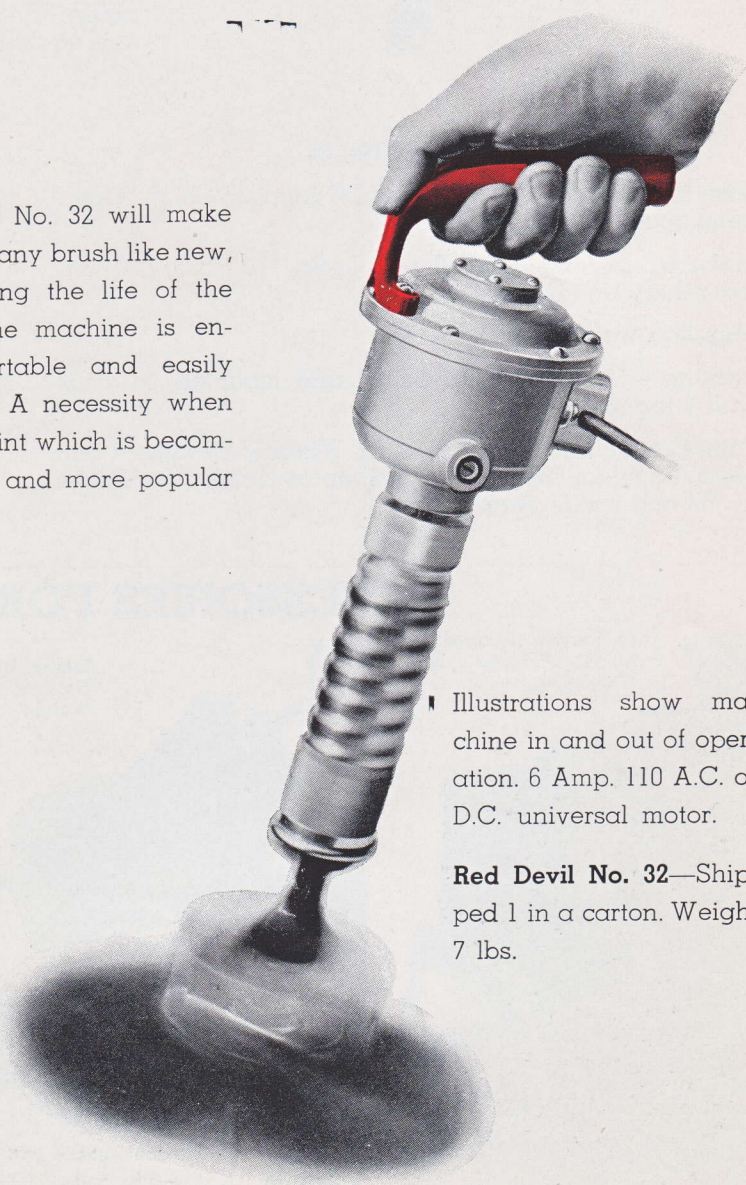

To round out the Red Devil Paint Conditioner Service, our engineers have now developed No. 32 Paint Brush Cleaner. This popular machine now makes it possible for the progressive paint store to offer a new unique unexcelled service to their customers at a minimum of expense.

No. 32

Red Devil No. 32 will make and keep any brush like new, quadrupling the life of the brush. The machine is entirely portable and easily operated. A necessity when casein paint which is becoming more and more popular is used.

Construction is of the finest possible quality. Polished nickel finish. Operates at 2,000 revolutions per minute. Simply let brushes stand in turpentine over night and then place in Red Devil No. 32. Place brush inside wide 5 gallon can. Press the easily operated switch and the centrifugal force will clean every bristle spotlessly clean in 2 minutes.

Illustrations show machine in and out of operation. 6 Amp. 110 A.C. or D.C. universal motor.

Red Devil No. 32—Shipped 1 in a carton. Weight 7 lbs.

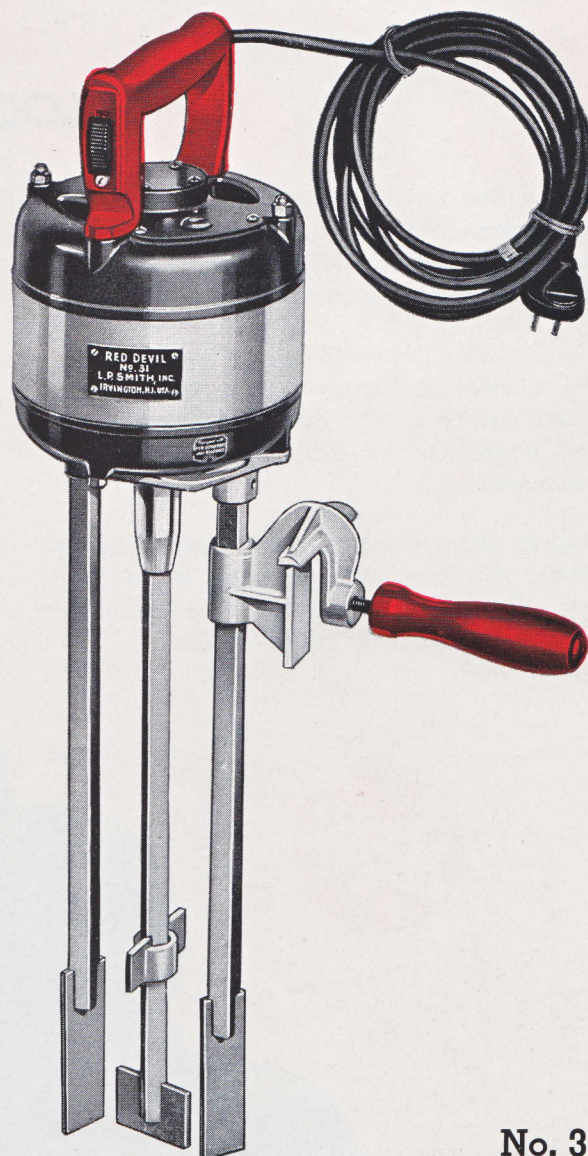

Red Devil

**PORTABLE ELECTRIC
PAINT MIXER
SAVES DOLLARS
ON EVERY JOB**

Making Minutes Save Hours

NEW

No. 31

When paint is mixed right it spreads easier, gives better coverage and makes a better job. Hand mixing, even to approximate the prime condition of paint mixed in a few minutes by the Red Devil Portable Electric Paint Mixer, requires lengthy, time-consuming effort whose cost is a factor on every job.

The Red Devil Mixer quickly pays for itself in time saved and improved characteristics of paint mixed in it. It is a motor appliance of highest quality and reliability at low price. This most modern machine is now made in 3 models for handling various size drums. Mixes and blends lead and oil, lead paste, paints, etc. It is entirely portable and can be used in the shop or on the job.

Revolutions—Agitating shaft rotates at 1750 revolutions a minute.

Height—27".

Motor Equipment— $\frac{1}{4}$ H.P. 60 cycle. 110 volts A.C. unless otherwise specified.

Red Devil No. 31B—Similar to No. 31 but with longer legs to fit 50 gallon drum. Shipped—1 in a crate. Weight 55 lbs.

FLOOR SANDING MACHINE

Red Devil FLOOR SANDER

PATENTED

A new Red Devil Division has been set up by Landon P. Smith, Inc., through the acquisition of the Rugaard Mfg. Co., of Lawrence, Mass., noted manufacturers of Floor Sanders.

The Red Devil No. 444 Leader model forms the nucleus of this new group of products which rounds out the Red Devil line of tools and equipment for the paint and flooring customers.

Modern designing and engineering skill plus sound merchandising methods make Red Devil Floor Sanders particularly inviting for individual uses or for rental to others.

NEW

No. 444

Light and Foolproof
Powerful and Efficient
All Parts are Standard
Reasonably Priced

Backed by Standard Red Devil Guarantee and Merchandising methods.

**BUILT SPECIALLY FOR THE MASTER PAINTER
AND FOR DEALER RENTAL BUSINESS**

Red Devil FLOOR SANDER

Most paint and hardware dealers do not fully comprehend the tremendously and steadily profitable rentals offered by the Red Devil Leader Model No. 444. \$3.00 to \$5.00 a day average rental on this 8" machine soon pays the cost of the unit and the rest is velvet. It is the same size that all professional men are using and all users like and fully appreciate it. Don't forget that you also sell Red Devil Sandpaper for use with the Floor Sander, and as every sanding job is a finishing job, shellac, varnish, lacquer, paint and brushes. Many other additional sales and additional dollars can easily be made. The Red Devil Leader is especially designed to withstand the heavy service and tough operations in the hands of inexperienced renters. It needs little servicing—ready to go out again the same day it is returned.

Quality Features

Easy To Use. Weighs only 120 lbs. Easily carried by one man. Does the work of five men. A woman can operate it. No dust! Plugs in on any floor or baseboard plug (A.C. or D.C.).

Does Better Work. Lays solid and steady to the floor. Will scrape average room in less than one hour. Sands within $\frac{5}{8}$ " of straight baseboard or flush with $\frac{1}{2}$ " round. No vibrations—no stop or chatter marks. Will remove 6 coats of paint without aid of any chemicals. Will surface up to 2,000 ft. of new flooring per day or up to 1,000 ft. of old flooring depending on its condition. Equally effective with backward or forward motion.

Foolproof. The Red Devil Floor Sander is strong and sturdy—built to stand-up without trouble under all kinds of operating conditions. No loose weights or guards to be forgotten or lost. A sanding machine that will please every customer and give constant service.

Will Last For Years. Only the finest materials and construction throughout. Built to give many years of profitable operation.

Guaranteed. Everything that can get out of order has been eliminated as far as humanly possible from the No. 444. All parts are standard. Backed by the standard Red Devil Guarantee.

Specifications

Motor—Powerful. Specially Built. 1 H.P. Red Devil Motor, constant speed guaranteed to carry $1\frac{1}{2}$ H.P. load, wound for 110 and 220. Legal to use from any socket. Uses no more current than an electric iron.

Sanding Drum. 8" wide overall by $4\frac{1}{2}$ " diameter. Covered with special $\frac{1}{2}$ " sponge-rubber pad. Scientifically balanced to give absolutely smooth sanding without vibration. Fast—cutting speed 1550 R.P.M.

Dust Collector. Gets all the dust—forward or backward operation. Only machine on the market with specially built Centrifugal Fan. Double SKF ball bearings enclosed in Scroll Housing, Revolves at speed of 4,000 R.P.M. Efficient. Driven by V-belt direct from double pulley on drum shaft.

Drive. Heavy, tough cord fabric V-belts from Motor to Drum and Fan. Noiseless—prevent slipping. No chains or gears to wear out.

Truck Wheels. Disc type (Basic) rubber tired wheels—absolutely silent.

Handle Assembly. Extra heavy tubular—chrome plated twin handles adjusted up or down to suit height of operator. Special bracket connecting exhaust pipe makes it sturdy and beautiful.

Equipment. 40 ft. Rubber covered, heavy No. 16, two-strand Extension Cable with twist lock connections plug. Six sheets sandpaper. Dust Bag and Wrench.

Sandpaper. Takes Red Devil 20" paper, 90 sheets to a 50-yard roll.

Design. Streamlined for efficiency and beauty. A machine you'll be proud of.

Red Devil No. 444—1 in a case; Weight 130 lbs.

Red Devil ELECTRIC FENCER

NEW

No. 333

Price \$10.95

A Transparent, Safe, Hermetically Sealed Electric Fencer that will run current through, up to 15 miles of wire satisfactorily from one 4-cell six-volt dry cell battery. Equal in quality to units selling for over three times its cost. Approved by Wisconsin Industrial Commission.

Since their inception, safer and better Electric Fencers have been consistently demanded in response to a steadily increasing market; state regulations have protected purchasers against poorly made, dangerous units. After exhaustive tests in laboratories, agricultural colleges, and in **actual** farm operations under adverse conditions, our engineers developed Red Devil No. 333—an economically priced, fully approved, **SAFE** Electric Fencer, introducing the famous trade mark into the agricultural equipment field.

No. 333 will save and make money for the farmer as it necessitates only a single strand of barbed wire to be strung on posts 40 to 50 feet apart. That cantankerous bull, or unruly colt, or fence-jumping cow is just as easily kept within bounds (or out of places where they are not wanted) as are peacefully grazing horses, sheep, cows, etc. Grazing areas are protected and confined at will, intrusion is discouraged. Red Devil Electric Fencer is recommended and installed in Industrial Plants and for enclosures of urban purpose.

Quality Features

Sealed Unit. Mechanism sealed (exclusive feature) against tampering and atmospheric conditions. (No. 333 will run just as well under water.)

No Radio Interference. Tests for various localities and sets show no difficulty.

Visible Operation. Heavy glass top enables operation to be easily watched and checked. When on display, the novelty of visible operation is customer attracting.

Economy. Operates more satisfactorily on lower voltage than any other fencer. A short circuit will not materially affect operation, insuring longer battery life.

Safe. Battery operation makes for absolute safety. Will not injure humans or animals. (Statistics show battery operated fences have NEVER caused serious injury.) Approved by Wisconsin Industrial Commission.

Construction. No revolving parts, no oil or grease. High or low temperatures will not affect operation.

Installation. Place anywhere in the barn or hang on a fence post or tree in the field. Hook up the battery (not included) and ground connection and the unit will operate up to 15 miles of barbed wire (smooth may be used) which should be insulated from posts.

Guarantee. We will replace any unit giving unsatisfactory service within one year from date of purchase providing seal is NOT broken.

Red Devil No. 333—1 in carton; Weight 9 lbs.

METAL DISPLAY PANELS TO FIT RED DEVIL No. 173 JUNIOR BILLBOARD

D 14 Metal Lithographed Display Panel is shipped FREE to dealers using Red Devil Paint Conditioning Machinery (See Pages 54-59). Fits No. 173 Billboard or will stand separately by bending back edges. If you now own a Red Devil Paint Conditioner—write for your panel—it's FREE.

D 13 Display Panel is included with every No. 173 Junior Billboard. (Page 51.) Furnished FREE at cost of Double Set of Tools shown.

- 2 each Nos. 0, 4, 5 Wood Scrapers
- 2 each Nos. 023, 024 Glass Cutters
- 2 only P1-1 $\frac{1}{4}$ F Putty Knives
- 2 only P1-3F Wall Scrapers
- 2 only No. 13 Jak-Nife Scrapers
- 2 each Nos. 3, 5, 10 Grady Wedges

D 15 Metal Lithographed Display Panel is shipped FREE to dealers selling the New, Heavily Plated Red Devil Glass Cutters. (See Page 4.) Fits No. 173 Billboard or will stand separately by bending back edges. Write for it.
